

**PUBLIC NOTICE**  
**Air Quality Construction Permit For**  
**Albuquerque Bernalillo County Water Utility Authority**

Albuquerque Bernalillo County Water Utility Authority (ABCWUA) has submitted an application for a new or modified air quality construction permit to the Air Quality Program (Program) of the City of Albuquerque Environmental Health Department. The complete application was received by the Program on June 3, 2019. The owner of the facility is ABCWUA located at One Civic Plaza NW, Room 5027, Albuquerque, New Mexico 87103. The facility, North Valley Stockpile, is located at 5408 Second Street NW, Albuquerque, NM 87107. This application file has been assigned **Permit Application No. 3278-M1**.

The applicant is requesting a modification to Permit #3278. The modification will address the following: (1) increase the hours of operation from 2,080 hours per year to 2,496 hours per year; (2) update the emissions from the screens; (3) update the requirements for screens SCR-01 and SCR-02 and engine ENG-01; (4) update the emission calculations for the screens and haulroads; and (5) correct some typographical errors.

The proposed air pollution maximum allowable emissions from this facility have been estimated to be:

POLLUTANT	Proposed Net Changes		Proposed Total Emissions <sup>1</sup>	
	(lbs/hr)	(tpy)	(lbs/hr)	(tpy)
Carbon Monoxide (CO)	0	0.2	0.46	0.68
Nitrogen Oxides (NOx)	0	0.09	1	1.19
Non-Methane Hydrocarbons (NMHC)	0	0.04	0.17	0.22
Sulfur Oxides (SO <sub>x</sub> )	0	0.03	0.14	0.18
Particulate Matter <10 microns (PM-10)	0.067	0.14	0.437	0.8
Particulate Matter <2.5 microns (PM-2.5)	0.0087	0.042	0.1787	0.252
Hazardous Air Pollutants (HAP)	0	0	0.001	0.002

<sup>1</sup>The proposed total emission in this notice could change slightly during the course of the Program's review of the application.

The Program has conducted a preliminary review of the information submitted with the permit application. The preliminary review and applicant's analysis of ambient air quality impacts indicated that the facility's air emission will meet the air quality standards for CO, NO<sub>x</sub>, NMHC, SO<sub>2</sub>, and Particulate Matter (PM<sub>10</sub> and PM<sub>2.5</sub>). In regards to the ozone air quality standard, ozone is normally only modeled for regional compliance demonstrations and does not need to be modeled for air quality permits subject to certain exceptions not applicable here. The Program's modeling guidelines are available at: <http://www.cabq.gov/airquality/air-quality-permits/dispersion-modeling-guidelines>.

A copy of the permit application as well as the Program's analysis, if completed, is available for inspection by the public at the Program offices. If a person wishes to receive notification of the availability of the Program's analysis for their review and comment, they must express that interest in writing to the Program before the end of the public comment period on August 12, 2019. Interested persons have 30 days to submit written comments and evidence, request a public information hearing, or both on the permit application to the Program. Comments will be accepted and considered if postmarked by the end of the public comment period. Formal action on the application will be reserved pending receipt and analysis of any additional details or information developed during the public comment period. Any person who does not participate in the permitting action will not receive notification of the Program's decision regarding the proposed permit, unless the person has delivered a written request for notice to the department. The application and the public notice are available online at <http://www.cabq.gov/airquality/air-quality-permits>.

The Program shall hold a Public Information Hearing pursuant to 20.11.41.15 NMAC if the Director determines there is significant public interest and a significant air quality issue is involved.

The Program expects to issue, issue subject to conditions, or deny this application before October 1, 2019. The Program will not issue or issue subject to conditions any air quality permit without an air quality ambient impact dispersion modeling study, if deemed necessary by the Program, that shows that the facility would not cause or contribute to a potential violation of air quality standards. Any person who does not participate in the permitting action will not receive notification of the Program's decision regarding the proposed permit, unless the person has delivered a written request for notice to the Program. If the Program issues the permit with conditions, the permit will include conditions that limit the emissions, and conditions that will require recordkeeping and reporting to the Program to ensure compliance with the federal and local air regulations.

The Program's offices are located at 1 Civic Plaza NW, Room 3047, Albuquerque, NM 87102. The Program's mailing address is Albuquerque Environmental Health Department, Air Quality Program – Permitting Section, PO Box 1293, Albuquerque, NM 87103.
