

Table of Contents

1. Hydrology
2. Site Development Considerations
3. Grading and Erosion Criteria
 - a. Slope Criteria
 - b. Grading near the property line
 - c. Grading in and adjacent to Major Facilities
 - d. Means of Erosion control
 - e. Levees & Berms
 - E.1 Definitions
 - E.2 Design criteria
 - E.2.1 Cross Section
 - E.2.3 Freeboard
 - E.2.3 Earthwork for Berms
 - E.2.4 Certification
4. Valley Drainage Criteria
 - 22.4.1 Single Lot Residential Development and Additions
 - 22.4.2 Residential Subdivisions
 - 22.4.3 Non-Single Family Residential and Commercial Property Development
 - 22.4.4 Flat Grading Scheme for Residential Subdivisions
5. Floodplain Development
6. Downstream capacity and offsite flows
 - 22.6.1 Downstream Capacity
 - 22.6.2 Offsite flows
 - 22.6.3 Historic Flow Path through Adjacent Private Property
7. Engineered Channels and Natural Arroyos
8. Street Hydraulics
9. Criteria for Hydraulic Design of Closed Conduit
10. Pond Requirements
 - a. Easement and agreement and covenants
 - b. Maintenance
 - c. Maintenance responsibilities for larger facilities private/public
11. Stormwater Quality and Low Impact Development
12. Drainage Right-of-Way (ROW) and Easements
13. Drainage Submittals
14. Type of Approval Sought
15. Maintenance and Post Construction Responsibility

16. Common Equations

17. History

18. Reference section

19. Storm drain and pond cost allocation program- currently in Chapter 17 section 2.E
