4. The subject is within in an Area of Consistency in the Comprehensive Plan. The following policies are relevant to the request:

Policy 4.1.2 Identity and Design: Protect the identity and cohesiveness of neighborhoods by ensuring the appropriate scale and location of development, mix of uses, and character of building design

The request will allow development that is of the same scale and character as the existing development in an existing residential area. Request furthers policy 4.1.2

Policy 4.1.5 Natural Resources: Encourage high-quality development and redevelopment that responds appropriately to the natural setting and ecosystem functions.

The approved SPS (13 EPC -40115) contains a list of approved plants for the open space and natural areas; these species will be used for planting adjacent to the Petroglyph National Monument, Mirehaven Arroyo and in the open spaces in the Impact Area. The site plans show internal open spaces area a sensitive treatment of the edge of the Petroglyph Monument that include single loaded streets and appropriate drainage. Requests further policy 4.1.5.

Policy 5.6.3 Areas of Consistency: Protect and enhance the character of existing single-family neighborhoods, areas outside of Centers and Corridors, parks, and Major Public Open Space.

a)Ensure that development reinforces the scale, intensity, and setbacks of the immediately surrounding context.

The request is consistent with existing development and will allow the existing development patterns to continue. The proposed site plan shows open space, trails and housing that is consistent with the existing development. The requirement to keep one additional access point is consistent with this policy. The request furthers Policy 5.6.3 and a.

5. The subject site is within the boundaries of the Westside Strategic Plan The WSSP identifies 13 communities in established areas of the West Side. The subject site is located in the Westland North community, one of the largest in the Plan area.

Policy 3.81: The City of Albuquerque and Bernalillo County shall, through their land use and design decisions, minimize negative impacts upon the National Monument. The Park Service shall, through their actions, attempt to minimize their negative impacts on the City, County, and adjacent neighborhoods and landowners.

The EPC, acting for the City, will make land use and design decisions that will affect the Petroglyph National Monument (PNM). The proposed additional height will not have a negative impact on the monument, because views will still be protected. The applicant included an analysis of the grading plan, a cut and fill diagram and a view analysis to show that the PNM would not be impacted. The request does not alter the access to the PNM or move drainage on to the PNM. The request furthers policy 3.81

6. The subject site is governed by the Westland Master Plan. There are no specific goals or policies in the WMP, but the plan has design guidelines. The existing Site Development Plan for Subdivision is consistent with these design guidelines.
