2-28 FLOOD CONTROL CHANNEL ACTION PLAN (CODE RAFT)

2-28-1 Rules and Procedures

A. Code Raft

1. Commencement of Albuquerque Fire Department Emergency Plan (Code Raft) will be initiated at the first indication of drowning victim(s) in the flood control channels located in the Northeast, Foothills, and/or Southeast Area Commands.

B. Responsibility

1. Upon confirmation of victim(s) in a flood control channel, which are trapped in the channel by water build-up, the following procedures will be initiated:
 - a. Emergency Communications Center dispatches officers to the prearranged checkpoints. Department personnel will keep citizens away from the flood control channel and stop people from attempting unauthorized rescue attempts.
 - b. A frequency will be secured by the Communications Center for the purpose of coordinating the rescue between personnel involved in the incident.
 - c. A supervisor will respond to the Albuquerque Fire Department's prearranged command post location for the purpose of relaying radio information to Albuquerque Fire Department personnel.
 - d. It will be the responsibility of all officers involved in the rescue procedure to act as spotters of the victim(s) location and direction of travel in the flood control channels, and relaying this information to the Emergency Communications Center and/or supervisor. Officers will not enter the water to initiate a water rescue of the victim(s).
