

**City of Albuquerque**

**Goal 5 - Environmental Protection and Enhancement**

**Environmental Health Department**

Food and Pool inspections ensure best management practices that prevent illnesses and protect the public health and safety of our community.

Based on a national average, health inspectors complete 2- 4 inspections per day. Albuquerque’s highly-trained and efficient health inspectors currently average 6 inspections per day.

Total inspections temporarily decreased in FY11 as the division underwent staffing and process improvement changes. The now fully-staffed division is on track to exceed 10,000 inspections in FY14.
