Police Department

Response Time - Dispatch to Onscene

The above graph depicts the elapsed time between the moment that a call is dispatched to Albuquerque Police Department officers and the moment that they arrive on scene. Although the measure is subject to fluctuations based on staff availability, it is still important because it portrays an expectation of service provision within a stated period. This measure will be updated quarterly, but may be delayed slightly to accrue accurate data. For more information regarding this measure, please contact APD's Communications Division Manager.
