RE: City Engineer's Estimated Unit Prices for Contract Items 2026

To whom it may concern:

The attached document represents the most recent update to the City Engineer's Unit Price Listing (Unit Price List), superseding all previous editions. A factor of 4.95% was applied to update the unit prices in an attempt to keep pace with inflation. New items were added as listed in the attached summary of changes.

The Unit Price List will continue to be used as the primary source to estimate the construction cost of public infrastructure for financial guaranty amounts as required by City ordinance. The Unit Price List is also intended to serve as a resource for consultants, contractors, and others in estimating construction costs associated with public infrastructure projects during the planning, design, and bid phases. A factor of 125% will be added to these prices for financial guaranty determinations. Unit prices do not include gross receipts tax. It remains the responsibility of the engineer to verify that the values in the Unit Price List are appropriate for their project.

The 2026 unit prices will be enforced effective August 1, 2026.

Please direct inquires and feedback regarding the Unit Price list to Kathy Verhage, PE, Design Review & Construction section supervisor, at (505) 924-3993.

Sincerely,

A handwritten signature in black ink, appearing to read 'Shahab Biazar', is written over a horizontal line.
