The application for a Certificate of Appropriateness is for new construction of four, single-family homes. The subject site is approximately .17-acre, located at 509-511 High Street SE, and legally described as Lots 3-A & 3-B, Block 30, Huning Highland Addition (the “subject site”). The subject site is zoned MX-T and is currently vacant. The proposed single-family homes would be 1,000 square feet each with gabled roofs and wood siding. The new construction will be compatible in height, form, massing, and proportion to surrounding properties.

This request was reviewed against the relevant guidelines for the Huning Highland Historic Overlay Zone and the criteria for approval of a Certificate of Appropriateness. Subject to conditions, Staff considers the proposal consistent with the guidelines and the criteria.

II INTRODUCTION

Proposal and History

The application for a Certificate of Appropriateness is for new construction of four, single-family homes. The subject site is approximately .17-acre, located at 509-511 High Street SE, and legally described as Lots 3-A & 3-B, Block 30, Huning Highland Addition (the “subject site). The subject site is zoned MX-T. The proposed single-family homes would be approximately 1,000 square feet each with a gabled roof, and wood siding. The front entrance for the Building A homes will be facing High Street SE and the entrance for Building B will face the alley.

The subject site was a single lot including 511 High Street which had a one-story hipped box duplex. At the time of initial historic inventories conducted in 1979, the house was described as being in “fair condition”. In a subsequent inventory in 2001, the house was described as “the front façade being substantially altered in the conversion from a single-family residence to a duplex with all doors and windows having modern replacements but in a haphazard and shoddy pattern”. Subsequently, sometime in 2007, the home was destroyed by a fire.
The MX-T zoning for the area was established at the effective date (5/17/18) of the Integrated Development Ordinance (IDO) based upon prior zoning and land use designations (SU-2/RO (residential). The SU-2 zone allowed for a mixture of uses controlled by the Sector Development Plan. SU-2 zoning was appropriate for areas where other available zones did not promote conservation of special neighbourhood characteristics, or where the land was developed with a mixture of uses which needed careful control and coordination, or where there were factors that impaired the sound growth of economic health of the area regulated by zoning.

Case history for the property includes Project #1010877 (16ZHE-80159 & 16ZHE-80160) that went before the Zoning Hearing Examiner on July 19, 2016. The request for each case was for a variance of 5 dwelling units per acre to the allowed 20 for proposed townhomes. The requests were approved by the Zoning Hearing Examiner.

The affected neighborhood organizations are the South Broadway Neighborhood Association and the Huning Highland Historic District Association. Property owners within 100 feet of the subject site were also notified as required.

**Context**

Upon the arrival of the Railroad in the Rio Grande Valley in 1880, tracks were laid two miles east of the small Villa de Albuquerque, and a "new town" was established. Rather than the traditional adobe structures of the villa, the brick wood and stone buildings of "new town" reflected the architecture, platting, tastes and lifestyles of the Midwesterners who came along with the railroad.

Huning Highland is named for Franz Huning, a German immigrant who made New Mexico his home in the mid-1860s. By 1880 he was a prominent citizen with land holdings east of the town. Lands that Huning owned east of the railroad were platted and sold as building lots beginning the Huning Highlands Subdivision. The new subdivision east of the railroad tracks became the early home for Albuquerque's many prominent business and professional citizens.

The architectural environment of Huning Highlands, including its streetscape and landscaping, is significant not only for its nineteenth and early twentieth-Century styles of building, but also for the variety and scale of its architecture. It is not a neighborhood of large mansions, but one of a variety of substantial homes and modest cottages. Styles range from the early Victorian to the more modest period revival cottage styles of the early part of this twentieth-century. During the 1920's the California bungalow gained prominence in popularity and examples of this style can also be found in the district.

Many of the houses are of wood frame with horizontal siding and corner trim boards. Other houses are constructed of brick; windows are graced with segmental arches, comers decorated with vertical dentils, adding the soft red color of brick to the streetscape. Cast stone also adds its own color and large textured scale to the variety of materials.

In addition to these basic building materials, various roof pitches and styles, dormers, leaded windows, broad front porches with Doric columns, tall brick chimneys with a various capping
patterns, stucco with Spanish tiles, and an array of decorative frieze boards, gable wall patterns and brick bracketry - most of which came to the area over the railroad from eastern mail order houses - add up to a neighborhood that is a cultural and historical resource of great value to any city and worth conserving. The Huning Highland Historic District was accepted to the National Register of Historic Places in 1978 and the Historic Overlay Zone was created by the City Council in 1979. The historic district continued to grow and develop through the first half of the twentieth-century.

The district contains numerous commercial buildings, concentrated primarily on Broadway and Central Ave, but also found on the east-west arterials of Lead, Coal and Martin Luther King. These commercial buildings include one and two-part commercial block buildings, commercial compounds, service stations, motels, drive-in restaurants and a bank of Modernist design. Institutions such as the St. George Greek Orthodox Church and Immanuel Lutheran Church and School and a former fire station, all contribute to the eclectic mix of buildings in the district. New multi-family buildings on Central Ave. near Old Albuquerque High School and on Silver and High Streets have been added circa 2000. There are additional industrial types of commercial buildings near the southeastern comer of the historic district. Lead Ave. is a two-lane, one-way street that was upgraded as part of an extensive City project completed in the past few years to beautify both Lead and Coal with landscaping and improve conditions for all modes of transportation.

APPLICABLE PLANS, ORDINANCES, DESIGN GUIDELINES & POLICIES

III ANALYSIS

Policies are written in regular text and staff analysis and comment in italic print.

Integrated Development Ordinance (IDO)

In May 2018, the Integrated Development Ordinance (IDO) replaced the City's Zoning Code and the property was zoned MX-T.

The property is located within the Huning Highland Historic Preservation Overlay Zone. The Integrated Development Ordinance Part 14-16-3-5 establishes controls and procedures for Historic Protection Overlay Zones (HPO). Part 14-16-3-5(J) identifies standards and guidelines for HPO 4: Huning Highland.

6-6(D)(3) Review and Decision Criteria

An application for a Historic Certificate of Appropriateness – Major shall be approved if it complies with all of the following criteria:

6-6(D)(3)(a) The change is consistent with Section 14-16-3-5 (Historic Protection Overlay Zones), the ordinance designating the specific HPO zone where the property is located, and any specific development guidelines for the landmark or the specific HPO zone where the property is located.

New construction within historic districts is encouraged because vacant lots break down the neighborhood fabric. Elements of the proposed houses are similar to those found within the neighborhood.
6-6(D)(3)(b) The architectural character, historical value, or archaeological value of the structure or site itself or of any HPO zone in which it is located will not be significantly impaired or diminished.

The proposal will cause no harm to the Huning Highland HPO-4. There is no existing contributing building on the site and the placement of the proposed houses will continue the street rhythm.

6-6(D)(3)(c) The change qualifies as a "certified rehabilitation" pursuant to the Tax Reform Act of 1976, if applicable.

Not applicable

6-6(D)(3)(d) The structure or site's distinguished original qualities or character will not be altered. For the purposes of Section 14-16-3-5 (Historic Protection Overlay Zones) and this Subsection 14-16-6-6(D), “original” shall mean as it was at the time of initial construction or as it has developed over the course of the history of the structure.

Not applicable.

6-6(D)(3)(e) Deteriorated architectural features shall be repaired rather than replaced, if possible. If replacement is necessary, the new material shall match the original as closely as possible in material and design.

Not applicable - the request is for a Certificate of Appropriateness for new construction.

6-6(D)(3)(f) Additions to existing structures and new construction may be of contemporary design if such design is compatible with its landmark status (if any) or the HPO zone.

The introduction of compatible new structures will add depth and contribute to the interest to the district as the new design and location reflect an understanding of and compatibility with the character of the district.

6-6(D)(3)(g) If the application is for a Historic Certificate of Appropriateness for demolition of a landmark or a contributing structure in an HPO zone, demolition shall only be allowed if it is determined that the property is incapable of producing a reasonable economic return as presently controlled and that no means of preserving the structure has been found. In making a determination regarding reasonable economic return, the LC or City Council may consider the estimated market value of the building, land, and any proposed replacement structures; financial details of the property, including but not limited to income and expense statements, current mortgage balances, and appraisals; the length of time that the property has been on the market for sale or lease; potential return based on projected future market conditions; the building’s structural condition; and other items determined to be relevant to the application.

Not applicable. The application is for new construction on a vacant lot, not demolition.
Resolution – 132-1980 Designating the Huning Highland Historic Overlay Zone

This resolution designated and mapped the Huning Highland Historic Overlay Zone. The District was established and adopted by the Council on June 2, 1980 and development guidelines were adopted with the resolution.

The proposal is consistent with the designation ordinance.

Huning Highland Historic Preservation Overlay Zone Design Guidelines

The development guidelines are administered by the LC, and include direction on such issues as building height, massing, proportion and scale, use of materials in new and existing buildings, relationship between buildings, landscaping, roadways, sidewalks, and the overall neighborhood character.

The Landmarks and Urban Conservation Commission approved specific development guidelines in 1991 as delegated by Resolution -46-1991. The guidelines were revised in 1998 and further revised and adopted by the LUCC in October 2010. They were later amended again when the uniform guidelines for New Town Neighborhoods were adopted in 2016.

POLICY – NEW BUILDINGS

New construction should add visual interest and a sense of scale to the streetscape and be compatible with the general characteristics of contributing buildings in the vicinity. New buildings should reflect designs traditionally used in the area.

Guidelines

1. Design new buildings to appear similar in scale to other buildings on the block.
   - Break large masses into smaller segments similar to other buildings.
   - The perceived mass of buildings from the street shall be reduced by details such as windows, doors and entry porches.

The street front mass of Building A (Units 1A & 2A) is similar to those of the neighborhood with a single-story projection. In addition, there is a front porch across ¼ of the building front. The majority of the houses on High Street are single story hipped boxes with scattered one to one and a half story gabled bungalows with gabled or hipped dormers. The A units will be two stories with the lower level at basement level. The height of Building A is approximately 18 feet. Units B will be single level homes at an approximate height of 14 feet.

Windows, doors, front porch and roof fenestrations will provide a sense of scale with the single-story front being what is seen from the pedestrian level.
2. Design a new building to reinforce a sense of human scale. This can be achieved with the use of:

- Building materials of traditional dimensions
- One-story porches
- Solid to void ratios that are similar to traditional buildings
- Windows should be recessed and similar in size to surrounding buildings.

Solid to void ratios and the fenestration pattern are similar to those found on neighboring properties. The materials palette will be cementitious batt-n-board siding with 5:12 pitched roofs with timber line shingles. The buildings will add visual interest and a sense of scale to the streetscape and will be compatible with the general characteristics of the Historic District.

3. Design the front elevation to appear similar in scale to neighboring contributing buildings.

- On a two-story building there should be a one-story element such as a porch.

The front elevation of Building A will be along High Street SE with a front porch across ¾ of the building front that includes wood steps and 36” tall railings. The design has adhered to building setbacks, orientation, spacing, and distance between adjacent buildings. The applicant will need to reconfigure the front doors for units 1A and 2A as the front doors facing the street are at a 40 degree angle. The front elevation of Building B faces the alley. The design of building B has also adhered to building setbacks, orientation, spacing, and distance between adjacent buildings.

4. Infill construction should enhance the pedestrian character of the district.

- Entrances to new buildings shall be oriented towards the street
- Maintain patterns of window and door proportions and placement found in the vicinity
- Maintain the front setback most common on the block
- The space between adjacent buildings should be the same as the average space between other buildings on the block
- Parking and garages should be located towards the rear of the property.

The proposal is for new construction on a vacant lot. The lot was originally a double lot with a single house which was destroyed by a fire in 2007.

The front entrance for Building A faces the street but are at a 40 degree angle that will need to be reconfigured. There is a front porch which covers ¾ of the front façade, with window openings on either side. The front setback for Building A is 15’ from the existing sidewalk. Building B is setback 23’ from the alley.

Four standard parking spaces have been provided at the rear of the lot that measure 9’-6” x 20’-0”. Access to the parking spaces will be from the alley to the rear of the property.

5. Use building forms that are similar to those of contributing buildings on the block.

The architectural language of the building references the traditional form of the neighboring contributing buildings. The building uses rectangular massing like most houses in the neighborhood.

6. Use roof forms that are similar to contributing buildings on the block.

- Hip and gabled roofs are appropriate in many settings
• Flat roofs should be used only where appropriate to the context and should have a parapet.

The new building has a pitched, gabled roof to complement the district with a gabled front porch extension.

The majority of the houses within Huning Highland have rather steep hipped roofs. There are also a number of gabled roofs and dormers.

7. Exterior materials used on new buildings should complement those materials found on contributing buildings in the neighborhood.

• The use of wood, masonry and stucco is encouraged. If wood is used, it must be laid in a historic manner such as beveled (clapboard) or drop (shiplap)
• Synthetic siding materials, such as cementitious products, may be appropriate if they are similar to traditional materials
• Wood is the preferred choice for window and doors, although Metal window frames may be appropriate in some contexts
• Roofing materials shall be similar in appearance to other buildings in the street.

The proposal utilizes standard building materials frequently seen in the area. These include cementitious batt-n-board siding and a 5:12 pitched roof with timberline shingles, and sash windows with 2 x 4 painted windows trims.

8. Imitation of older historic styles is discouraged.

• Interpretations of historic styles may be appropriate if they are subtly distinguishable as new buildings.
• Incorporate details and ornamentation found on historic buildings within the context of new construction.

The building has been designed to be compatible with but discernable from the adjacent contributing buildings in the neighborhood and district.

9. Contemporary interpretations of traditional detail are encouraged.

• New designs for details such as window and door trim, porch railings, columns add interest while remaining compatible with historic buildings.

The spacing, placement, scale, orientation, proportion and size of the window openings of the building are compatible with the surrounding area with hipped and gabled roofs relating to traditional styling.

The front doors will need to be reconfigured as at this time, they are at a 40 degree angle facing the street and alley.

**POLICY – SITE FEATURES & STREETSCAPES**

Historic site features should be retained. New site features should be compatible with the architectural character of the historic district.
Guidelines

1. Preserve historically significant site features which may include:
   - Historic retaining walls, gardens, driveways and walkways, some fences and street trees are examples of original site features that should be preserved.
   - Sidewalks, planting strips, street trees and street lighting are examples of historic streetscape elements that should be considered in all civic projects.
   - Street medians and other landscaped, public rights-of-way shall be maintained by the City of Albuquerque. Routine maintenance and repair do not require a Certificate of Appropriateness. Any alteration of the public right-of-way is subject to approval by the Landmarks and Urban Conservation Commission.

   *Not applicable.*

Site Grading and Lot Pattern

2. The historic lot pattern creates a rhythm of buildings and the spaces between them should be maintained.
   - Lots should not be consolidated or subdivided except, where lots have been consolidated in the past; replatting to traditional lot size is desirable.

   *Not applicable.*

3. Preserve the historic grading design of the site.
   - Altering the overall appearance of the historic grading is not appropriate. While some changes may be considered, these should remain subordinate and the overall historic grading character shall be preserved.
   - Any change of more than one foot in existing grade at any point within the front yard setback requires a Certificate of Appropriateness. In cases where a site’s grading is a character-defining feature that establishes the visual shape and visual appearance of the historic district, significantly altering or removing the grade is prohibited.

4. Grading and drainage plans required for new construction shall show both existing and proposed grades.

   *Grading and drainage plans have not been submitted but will be required as part of the building permitting process.*

5. Maintain the planting strip.
   - Impervious materials such as brick pavers, concrete pavers and concrete are prohibited.
   - City Ordinance prohibits the planting or removal of street trees in the parking strip or other public right-of-way without a permit from the City Forester. Refer to Chapter 6-6-1 (R.O.A. 1994) for information on the removal of street trees.

   *The materials palette for landscape improvements have not been submitted but will be required at the time of building permitting.*
Fences and Free Standing Walls

6. Preserve historic fences and yard walls when feasible.
   • Replace only those portions that are deteriorated beyond repair.
   Not applicable.

7. When constructing new fences, use materials that appear similar to those used historically.
   • Simple designs consistent with historic iron fencing, wood picket fencing and other historic types are recommended over more contemporary styles. In all cases, the fence components should be similar in scale to those seen historically in the neighborhood.
   • Where an ornate style of fencing can be documented as having been present at the property, that historic fencing may be replicated.
   • A painted wood picket fence is an appropriate replacement in most locations.
   • A simple metal fence, similar to traditional “wrought iron” or wire may be appropriate.
   • Coyote fencing, split rail fencing and chain link fencing are not appropriate materials for these historic districts and are prohibited.
   • Vinyl and other synthetic fencing are reviewed on a case-by-case basis. In some instances, it may be allowed if it is not seen from the street, if the style of the fence is compatible with the house and if the vinyl fence is not replacing a historic fence or landscape feature.
   • The use of extruded vinyl fencing material is not permitted in the front yard.
   • Cellular vinyl fencing may be appropriate if painted.
   Not applicable.

8. A front yard fence should have a “transparent” quality, allowing views into the yard from the street.
   • Using a solid fence, with no spacing between the boards, is not appropriate in a front yard.
   • A front yard fence should not obscure the character defining features of the house.
   Not applicable.

9. Fences taller than three feet may be appropriate in side or rear yards. However, the fence should not begin before the midpoint of the house.
   Not applicable.

10. CMU block walls shall be stuccoed and architecturally integrated into the building.
   Not applicable. The original design called for a CMU block wall to separate Buildings A & B but the applicant is now proposing a wood picket fence at a height of 6-7 feet.

Parking areas and driveways

18. Avoid large expanses of parking
   • Divide large parking lots with planting areas. Large parking areas are those with more than five cars.
   • Locate parking areas to the rear of the property when physical conditions permit.
   • An alley should serve as the primary access to parking when physical conditions permit.
   • Parking shall not be located in the front yard, except in driveways. Existing driveways should not be widened or expanded. Paving in the front yard setback other than for driveways is prohibited.
19. Screen parking areas from view of the street.
   - Automobile headlight illumination should be screened from adjacent lots and the street. Fences, walls and planting, or a combination of these should be used to screen parking.

Four standard parking spaces have been provided at the rear of the lot that are to be accessed through the alley. The dimensions for the parking spaces are 9'-6” x 20'-0”.

Landmarks and Urban Conservation Ordinance

This site consists of a contributing property in the Huning Highland Historic Preservation Overlay Zone and the project is subject to certain provisions of the Landmarks and Urban Conservation Ordinance (Article 12, R.O.A., 1994). The purpose of this ordinance is to:

“Preserve, protect, enhance, perpetuate and promote the use of structures and areas of historical, cultural, architectural, engineering, archeological or geographic significance located in the city; to strengthen the city’s economic base by stimulating the tourist industry; to enhance the identity of the city by protecting the city’s heritage and prohibiting the unnecessary destruction or defacement of its cultural assets; and to conserve existing urban developments as viable economic and social entities.”

Section 14-12-8 (A) of the LUC ordinance provides that:

"Within the boundaries of a historic zone, urban conservation overlay zone, or landmark site, the exterior appearance of any structure shall not be altered, new structures shall not be constructed, and existing structures shall not be demolished until a Certificate of Appropriateness has been duly approved."

Section 14-12-8 (B) of the LUC ordinance provides criteria for approval of a Certificate of Appropriateness:

\[\text{§14-12-8 (B)(1)}\] The change is consistent with the designation ordinance and specific development guidelines for the historic preservation overlay zone.

The new construction is consistent with the designation ordinance and specific development guidelines for the historic preservation overlay zone.

\[\text{§14-12-8 (B)(2)}\] The architectural character, historical value, or archaeological value of the structure or site itself or of any historic zone in which it is located will not be significantly impaired or diminished.

The new construction will not impair or diminish the architectural character, historical value, or archaeological value of the neighboring contributing buildings or the Huning highland HPOZ.

\[\text{§14-12-8 (B)(3)}\] The change qualified as a “certified rehabilitation: pursuant to the Tax Reform Act of 1976.
Not applicable.

§14-12-8 (B)(4) The structure or site’s distinguished original qualities or character will not be altered. Original shall mean at the time of initial construction or developed over the course of history of the structure.

Not applicable.

§14-12-8 (B)(5) Deteriorated architectural features should be repaired rather than replaced, if possible. If replacement is necessary, the new material shall match the original as closely as possible in like material and design.

Not applicable.

§14-12-8 (B)(6) Additions to existing structures and new construction may be of contemporary design if such design is compatible with the historic zone in which it is to be located.

The building has been designed to be compatible with but discernable from the adjacent contributing buildings in the neighborhood and district.

§14-12-8 (B)(7) Demolition shall only be permitted if it is determined that the property is incapable of producing a reasonable economic return as presently controlled and that no means of preserving the structure has been found. In making a determination regarding reasonable economic return the Commission may consider the estimated market value of the building, land and any proposed replacement structures, financial details of the property including, but not limited to income and expense statements, current mortgage balances and appraisals, the length of time that the property has been on the market for sale or lease, potential return based on projected future market conditions, the building’s structural condition, and other items determined to be relevant to the application.

Not applicable.

Neighborhood Notification

The applicant notified the South Broadway Neighborhood Association, the Huning Highland Historic District Association, and neighboring properties within 100 ft., excluding public rights of way. The requisite sign was posted at the property giving notification of this application.

Conclusions

As discussed in the analysis above, the project complies with the applicable guidelines for the Huning Highland Historic Preservation Overlay Zone and the criteria for approval of a Certificate of Appropriateness.

Staff concludes that the project is eligible for a Certificate of Appropriateness, subject to the recommended conditions of approval.

1. The application is a request for a Certificate of Appropriateness for new construction, located at 509-511 High Street SE, legally described as Lots 3-A & 3-B, Block 30, Huning Highland Addition (the “subject site”). The property is located in the Huning Highland Historic Preservation Overlay Zone (HPO-4), zoned R-1A.

2. The subject site is approximately 0.17 acres.

3. The application for a Certificate of Appropriateness is for new construction of four, single-family homes. Each home would be approximately 1,000 square feet. The new construction will be a compatible but contemporary project that reflects an understanding of and compatibility with the character of the district.

4. Section 14-12-8(A) of the Landmarks and Urban Conservation Ordinance states that within the boundaries of a historic zone, the exterior appearance of any structure shall not be altered, new structures shall not be constructed, and existing structures shall not be demolished until a Certificate of Appropriateness has been duly approved.

5. The LUC Ordinance specifies that an application for a Certificate of Appropriateness shall be approved if it complies with several specified criteria. The LUC Ordinance Section 14-12(8) (B)(1) states that a Certificate of Appropriateness shall be approved if “The change is consistent with the designation ordinance and specific development guidelines for the landmark or historic zone”.

6. Subject to Staff approval of the reconfiguration of the front doors, the proposed work is consistent with designation ordinance R-132-1980. The proposed work complies with the relevant development guidelines for the historic zone as described in the Staff Report and in Findings 7 & 8 below.

7. The proposal is consistent with the Guidelines for the Huning Highland HPOZ.

The street front mass of the building (Units 1A & 2A) is similar to those of the neighbourhood with a single-story projection. In addition, there is a front porch across ¾ of the building front. The majority of the houses on High Street are single story hipped boxes with scattered one to one and a half story gabled bungalows with gabled or hipped dormers. The A units will be two stories with the lower level at basement level. Units B will be single level homes.

Windows, doors, front porch and roof fenestrations will provide a sense of scale with the single-story front being what is seen from the pedestrian level. The new structures will be appropriate to the distinctive local context.
8. The LUC Ordinance Section 14-12(8) (B)(2) states that a Certificate of Appropriateness shall be approved if “The architectural character, historical value, or archaeological value of the structure or site itself or of any historic zone or urban conservation overlay zone in which it is located will not be significantly impaired or diminished”.

The architectural character and historical value of the Huning Highland Historic Preservation Overlay Zone will not be significantly impaired or diminished, due to the proposal’s conformance with the specific development guidelines.

RECOMMENDATION

APPROVAL of Case SI-2021-02478/Project #PR-2019-005985, an application for a Certificate of Appropriateness for new construction of four single-family homes, located at 509-511 High Street SE, legally described as Lots 3-A & 3-B, Block 30, Huning Highland Addition, a property in the Huning Highland Historic Protection Overlay Zone, based on the above eight (8) findings and subject to the following condition:

Recommended Conditions of Approval

1. Applicant is responsible to acquire, and approval is contingent upon, all applicable permits and related approvals.
2. Approval is contingent upon reconfiguration of the front doors and Staff endorsement.
3. Grading and drainage plans will need to be submitted at the time of the building permitting.

CTB DEVELOPMENT LLC requests a special exception to Section 14-16-2-23(A), South Broadway SDP, Pg 45(B)(II) and 14-16-2-13(A)(2): a VARIANCE of 5 dwelling units per acre to the allowed 20 for a proposed new townhome for all or a portion of Lot 3-A, Block 30, Hunings Highland Addn zoned SU-2 LCR, located on 509 HIGH ST SE (K-14)

On the 19th day of July, 2016, CTB DEVELOPMENT LLC (“Applicant”) appeared before the Zoning Hearing Examiner (“ZHE”) requesting a variance of 5 dwelling units per acre to the allowed 20 for a proposed new townhome (“Application”) upon the real property located at 509 HIGH ST SE (“Subject Property”). Below are the ZHE’s findings of fact and decision:

FINDINGS:

1. Applicant is requesting a variance of 5 dwelling units per acre to the allowed 20 for a proposed new townhome.

2. The City of Albuquerque Zoning Code of Ordinances Section 14-16-4-2 (C)(2) (Special Exceptions – Variance) reads: “A variance application shall be approved by the Zoning Hearing Examiner, if and only if, the Zoning Hearing Examiner finds all of the following:
(a) The application is not contrary to the public interest or injurious to the community, or to property or improvements in the vicinity;
(b) There are special circumstances applicable to the subject property which do not apply generally to other property in the same zone and vicinity such as size, shape, topography, location, surroundings, or physical characteristics created by natural forces or government action for which no compensation was paid;
(c) Such special circumstances were not self-imposed and create an unnecessary hardship in the form of a substantial and unjustified limitation on the reasonable use or return on the property that need not be endured to achieve the intent and purpose of the Zoning Code (§14-16-1-3) and the applicable zoning district; and
(d) Substantial justice is done.”

3. The Applicant bears the burden of ensuring there is evidence in the record supporting a finding that the above criteria are met under Section 14-16-4-2(C).

4. The ZHE finds that Application is not: (i) contrary to the public interest, (ii) injurious to the community; or (iii) injurious to the property or improvements located in the vicinity as required by Section 14-16-4-2 (C)(2)(a).
5. Specifically, the ZHE finds that the size, scale and arrangement of the proposed structures (there will be four structures total on two lots, with the variance essentially only needed for one structure) will be harmonious with the subject property and the community. The structures will not unreasonably interfere with the views, light or access of other residents or detrimentally impact neighborhood character or security. The ZHE finds that there will be no significant increase in intensity of use, noise or traffic.

6. The ZHE finds that there are special circumstances applicable to the Subject Property which do not apply generally to other property in the same zone and vicinity such as size, shape, topography, location, surroundings, or physical characteristics created by natural forces or government action for which no compensation was paid, as required by Section 14-16-4-2(C)(2)(b).

7. Specifically, the ZHE finds that the property was formerly blighted, and the division and proposed development address those special circumstances in a manner that is beneficial to the community and supports a home ownership model.

8. The ZHE finds that such special circumstances were not self-imposed and create an unnecessary hardship in the form of a substantial and unjustified limitation on the reasonable use or return on the property that need not be endured to achieve the intent and purpose of the Zoning Code (§14-16-1-3) and the applicable district, as required by Section 14-16-4-2(C)(2)(c).

9. Specifically, the ZHE finds that Applicant did not create the circumstances, and seeks only a reasonable use of the subject parcels.

10. The ZHE finds that substantial justice will be done if this Application is approved, as required pursuant to Section 14-16-4-2(C)(2)(d).

11. The ZHE finds that the proper “Notice of Hearing” signage was posted for the required time period as required by Section 14-16-4-2(B)(4).

12. The ZHE finds that the Applicant has authority to pursue this Application.

CONCLUSIONS OF LAW:

The criteria within Section 14-16-4-2(C)(2) of the Albuquerque Zoning Code are satisfied.

DECISION:

APPROVAL of a variance of 5 dwelling units per acre to the allowed 20 for a proposed new townhome.

If you wish to appeal this decision, you must do so by August 18, 2016, in the manner described below. A non-refundable filing fee will be calculated at the Planning Department’s Land Development Coordination counter and is required at the time the Appeal is filed.

Appeal is to the Board of Appeals within 15 days of the decision. A filing fee of $105.00 shall accompany each appeal application, as well as a written explanation
outlining the reason for appeal and a copy of the ZHE decision. Appeals are taken at 600 2nd Street, Plaza Del Sol Building, Ground Level, Planning Application Counter located on the west side of the lobby. Please present this letter of notification when filing an appeal. When an application is withdrawn, the fee shall not be refunded.

An appeal shall be heard by the Board of Appeals within 45 days of the appeal period and concluded within 75 days of the appeal period. The Planning Division shall give written notice of an appeal, together with a notice of the date, time and place of the hearing to the applicant, a representative of the opponents, if any are known, and the appellant.

Please note that pursuant to Section 14.16.4.4.(B), of the City of Albuquerque Comprehensive Zoning Code, you must demonstrate that you have legal standing to file an appeal as defined.

You will receive notice if any other person files an appeal. If there is no appeal, you can receive building permits any time after the appeal deadline quoted above, provided all conditions imposed at the time of approval have been met. However, the Zoning Hearing Examiner may allow issuance of building permits if the public hearing produces no objection of any kind to the approval of an application. To receive this approval, the applicant agrees in writing to return the building permit or occupation tax number.

Successful applicants are reminded that other regulations of the City must be complied with, even after approval of a special exception is secured. This decision does not constitute approval of plans for a building permit. If your application is approved, bring this decision with you when you apply for any related building permit or occupation tax number. Approval of a conditional use or a variance application is void after one year from date of approval if the rights and privileges are granted, thereby have not been executed or utilized.

tobe@swcp.com
CTB DEVELOPMENT LLC requests a special exception to Section 14-16-2-23(A), South Broadway SDP Pg 45(B)(II) and 14-16-2-13(A)(2): a VARIANCE of 5 dwelling units per acre to the allowed 20 for a proposed new townhome for all or a portion of Lot 3-B, Block 30, Hunning Highland Addn zoned SU-2 LCR, located on 511 HIGH ST SE (K-14)

Special Exception No:............ 16ZHE-80160
Project No:........................ Project# 1010877
Hearing Date:..................... 07-19-16
Closing of Public Record:...... 07-19-16
Date of Decision:............... 08-03-16

On the 19th day of July, 2016, CTB DEVELOPMENT LLC ("Applicant") appeared before the Zoning Hearing Examiner ("ZHE") requesting a variance of 5 dwelling units per acre to the allowed 20 for a proposed new townhome ("Application") upon the real property located at 511 HIGH ST SE ("Subject Property"). Below are the ZHE’s findings of fact and decision:

FINDINGS:

1. Applicant is requesting a variance of 5 dwelling units per acre to the allowed 20 for a proposed new townhome.
2. The City of Albuquerque Zoning Code of Ordinances Section 14-16-4-2 (C)(2) (Special Exceptions – Variance) reads: "A variance application shall be approved by the Zoning Hearing Examiner, if and only if, the Zoning Hearing Examiner finds all of the following:
   (a) The application is not contrary to the public interest or injurious to the community, or to property or improvements in the vicinity;
   (b) There are special circumstances applicable to the subject property which do not apply generally to other property in the same zone and vicinity such as size, shape, topography, location, surroundings, or physical characteristics created by natural forces or government action for which no compensation was paid;
   (c) Such special circumstances were not self-imposed and create an unnecessary hardship in the form of a substantial and unjustified limitation on the reasonable use or return on the property that need not be endured to achieve the intent and purpose of the Zoning Code (§14-16-1-3) and the applicable zoning district; and
   (d) Substantial justice is done."
3. The Applicant bears the burden of ensuring there is evidence in the record supporting a finding that the above criteria are met under Section 14-16-4-2 (C).
4. The ZHE finds that Application is not: (i) contrary to the public interest, (ii) injurious to the community; or (iii) injurious to the property or improvements located in the vicinity as required by Section 14-16-4-2 (C)(2)(a).
5. Specifically, the ZHE finds that the size, scale and arrangement of the proposed structures (there will be four structures total on two lots, with the variance essentially only needed for one structure) will be harmonious with the subject property and the community. The structures will not unreasonably interfere with the views, light or access of other residents or detrimentally impact neighborhood character or security. The ZHE finds that there will be no significant increase in intensity of use, noise or traffic.

6. The ZHE finds that there are special circumstances applicable to the Subject Property which do not apply generally to other property in the same zone and vicinity such as size, shape, topography, location, surroundings, or physical characteristics created by natural forces or government action for which no compensation was paid, as required by Section 14-16-4-2(C)(2)(b).

7. Specifically, the ZHE finds that the property was formerly blighted, and the division and proposed development address those special circumstances in a manner that is beneficial to the community and supports a home ownership model.

8. The ZHE finds that such special circumstances were not self-imposed and create an unnecessary hardship in the form of a substantial and unjustified limitation on the reasonable use or return on the property that need not be endured to achieve the intent and purpose of the Zoning Code (§14-16-1-3) and the applicable district, as required by Section 14-16-4-2(C)(2)(c).

9. Specifically, the ZHE finds that Applicant did not create the circumstances, and seeks only a reasonable use of the subject parcels.

10. The ZHE finds that substantial justice will be done if this Application is approved, as required pursuant to Section 14-16-4-2 (C)(2)(d).

11. The ZHE finds that the proper “Notice of Hearing” signage was posted for the required time period as required by Section 14-16-4-2(B)(4).

12. The ZHE finds that the Applicant has authority to pursue this Application.

CONCLUSIONS OF LAW:

The criteria within Section 14-16-4-2(C)(2) of the Albuquerque Zoning Code are satisfied.

DECISION:

APPROVAL of a variance of 5 dwelling units per acre to the allowed 20 for a proposed new townhome.

If you wish to appeal this decision, you must do so by August 18, 2016, in the manner described below. A non-refundable filing fee will be calculated at the Planning Department’s Land Development Coordination counter and is required at the time the Appeal is filed.

Appeal is to the Board of Appeals within 15 days of the decision. A filing fee of $105.00 shall accompany each appeal application, as well as a written explanation
outlining the reason for appeal and a copy of the ZHE decision. Appeals are taken at 600 2nd Street, Plaza Del Sol Building, Ground Level, Planning Application Counter located on the west side of the lobby. Please present this letter of notification when filing an appeal. When an application is withdrawn, the fee shall not be refunded.

An appeal shall be heard by the Board of Appeals within 45 days of the appeal period and concluded within 75 days of the appeal period. The Planning Division shall give written notice of an appeal, together with a notice of the date, time and place of the hearing to the applicant, a representative of the opponents, if any are known, and the appellant.

Please note that pursuant to Section 14.16.4.4 (B), of the City of Albuquerque Comprehensive Zoning Code, you must demonstrate that you have legal standing to file an appeal as defined.

You will receive notice if any other person files an appeal. If there is no appeal, you can receive building permits any time after the appeal deadline quoted above, provided all conditions imposed at the time of approval have been met. However, the Zoning Hearing Examiner may allow issuance of building permits if the public hearing produces no objection of any kind to the approval of an application. To receive this approval, the applicant agrees in writing to return the building permit or occupation tax number.

Successful applicants are reminded that other regulations of the City must be complied with, even after approval of a special exception is secured. This decision does not constitute approval of plans for a building permit. If your application is approved, bring this decision with you when you apply for any related building permit or occupation tax number. Approval of a conditional use or a variance application is void after one year from date of approval if the rights and privileges are granted, thereby have not been executed or utilized.

Re: Upcoming construction

To whom it may concern,

This letter is to inform you that UNIFIED CONTRACTOR has applied for a Certificate of Appropriateness for new construction at 509-511 High St. SE, lots 3A and 3B block 30 of the Huning Highland Addition, a property in the Huning Highland Historic Overlay Zone, zoned SU-2/LCR

Currently the property is vacant land. The proposal is to construct 4 new single family houses. The proposed houses would be two-story, approximately 1000sq. feet each, with a gabled roof and wood siding exterior. A partial width one-story entry porch is located at the front of 3 of the 4 proposed buildings.

Attached are drawings of the project and Zoning maps.

Please call Ivan at 505-350-3324, or email at ivan@unifiedcontractor.com with any questions or concerns.

Sincerely,

Ivan Santistevan
President

IRS/tg
SIGN POSTING AGREEMENT

REQUIREMENTS

POSTING SIGNS ANNOUNCING PUBLIC HEARINGS

All persons making application to the City under the requirements and procedures established by the City Zoning Code or Subdivision Ordinance are responsible for the posting and maintaining of one or more signs on the property which the application describes. Vacations of public rights-of-way (if the way has been in use) also require signs. Waterproof signs are provided at the time of application. If the application is mailed, you must still stop at the Development Services Front Counter to pick up the sign.

The applicant is responsible for ensuring that the signs remain posted throughout the 15-day period prior to public hearing. Failure to maintain the signs during this entire period may be cause for deferral or denial of the application. Replacement signs for those lost or damaged are available from the Development Services Front Counter at a charge of $3.75 each.

1. LOCATION
   A. The sign shall be conspicuously located. It shall be located within twenty feet of the public sidewalk (or edge of public street). Staff may indicate a specific location.
   B. The face of the sign shall be parallel to the street, and the bottom of the sign shall be at least two feet from the ground.
   C. No barrier shall prevent a person from coming within five feet of the sign to read it.

2. NUMBER
   A. One sign shall be posted on each paved street frontage. Signs may be required on unpaved street frontages.
   B. If the land does not abut a public street, then, in addition to a sign placed on the property, a sign shall be placed on and at the edge of the public right-of-way of the nearest paved City street. Such a sign must direct readers toward the subject property by an arrow and an indication of distance.

3. PHYSICAL POSTING
   A. A heavy stake with two crossbars or a full plywood backing works best to keep the sign in place, especially during high winds.
   B. Large headed nails or staples are best for attaching signs to a post or backing; the sign tears out less easily.

4. TIME
   Signs must be posted from September 28, 2021 To October 13, 2021

5. REMOVAL
   A. The sign is not to be removed before the initial hearing on the request.
   B. The sign should be removed within five (5) days after the initial hearing.

I have read this sheet and discussed it with the Development Services Front Counter Staff. I understand (A) my obligation to keep the sign(s) posted for (15) days and (B) where the sign(s) are to be located. I am being given a copy of this sheet.

Ivan Santistevan
(Applicant or Agent) 9/7/2021

I issued 1 signs for this application, 9.8.2021
(Date) (Staff Member)
