INTER-OFFICE MEMORANDUM

TO: Cynthia Borrego, President, City Council
FROM: Brennon Williams, Planning Director

SUBJECT: AC-21-2, Project-2019-003219, VA-2020-00386, VA-2021-00007: Garcia Kramer & Associates, agent for Charter School Solutions, appeals the Zoning Hearing Examiners decision to Deny a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right-of-way for a proposed electronic sign for Lot E1A2, Panorama Heights Addn, located at 99999 Lomas BLVD NE, zoned MX-M [Section 14-16-5-12(H)(2)(c)]

OVERVIEW
Applicant filed a request for a variance of 120 feet to the minimum required 660 foot distance from the outer edge of Tramway Boulevard right-of-way for a proposed electronic sign. The request was scheduled and heard at the December 15, 2020 public hearing.

In the Notice of Decision issued December 30, 2020, the Zoning Hearing Examiner found that the applicant did not meet the Variance-Review and Decision Criteria in Section 14-16-6-6(N)(3)(a) of the Integrated Development Ordinance. Specifically, because the use is prohibited by the Integrated Development Ordinance and approval of the application would undermine its purpose.

BASIS FOR APPEAL AND STAFF RESPONSE
Section 14-16-6-4(V)(4) outlines the applicable criteria for the appeal in determining whether the Zoning Hearing Examiner erred in their decision:

**6-4(V)(4) Criteria for Decision**
The criteria for review of an appeal shall be whether the decision-making body or the prior appeal body made 1 of the following mistakes:
6-4(V)(4)(a) The decision-making body or the prior appeal body acted fraudulently, arbitrarily, or capriciously.
6-4(V)(4)(b) The decision being appealed is not supported by substantial evidence.
6-4(V)(4)(c) The decision-making body or the prior appeal body erred in applying the requirements of this IDO (or a plan, policy, or regulation referenced in the review and decision-making criteria for the type of decision being appealed).

The reasons for the appeal, excerpted from Appellant’s letter, are listed below, with a bulleted, italicized response from the Planner for the Zoning Hearing Examiner. Please see the Appellant’s letter and submittal packet for additional details.

**The ZHE’s Decision in This Matter Constituted an Abuse of Discretion and Went Outside His Scope of Authority**

Rather than objectively weigh the evidence presented in the application and at the hearing for meeting the criteria for a variance approval, the ZHE chose to focus and place considerable weight on the question of whether a variance to the 660’ dimension could be even considered if electronic signs are “prohibited”.

And since electronic signs are already an allowed “use” in the MX-M zone, this variance request should be allowed to proceed for an exception to the dimensional standard of 660’ pursuant to the definition of a variance.

- *The Integrated Development Ordinance specifically prohibits electronic signs within 660 feet of Tramway Blvd per Section 5-12(H)(2)(c) Prohibited Areas.*

**The ZHE Erred in Applying Adopted City Plans, Policies, and Ordinances in Arriving at the Decision**

The ZHE failed to take into consideration adopted elements of the IDO, specifically the definition of a “variance”- Reference 14-16-7-1.

- *Appellant requested a variance to a dimensional standard for a use that is prohibited.*
- *The allowable use of premises may never be changed via a Variance.*

There is no analysis or explanation that was given in the ZHE “Findings” as to why the application “undermined the intent and spirit of the IDO”

- *Finding #8: Section 14-16- 5-12(H)(2)(c) specifically prohibits electronic signs within 660 feet of the outer edge of Tramway.*
- *Finding #9: Approval of the variance would materially undermine the intent and purpose of the IDO.*
- *Finding #10 Given that criterion (4) in Section 14-16-6-6(N)(3)(a) (Variance-Review and Decision Criteria) has not been satisfied, the variance must be denied, and it is therefore unnecessary to examine any other element required to establish a variance.*
The ZHE’s Decision was Arbitrary and Capricious And Should be Reversed

In his ruling, the ZHE failed to specify the basis on which the ruling was made, including naming any injury that would be caused or citing any of the twelve provisions – subsections 1-3(A) thru 1-3(L) of the IDO’s “Purpose” 14-16-1-3, which according to Findings #9 of the ZHE decision, this section was the reason for denial of the variance.

• See Findings 8-10 listed above. Because the use is prohibited by the Integrated Development Ordinance, and approval would undermine its purpose, the Zoning Hearing Examiner denied the application.

Charter Schools Solutions (Agent, Garcia/Kraemer & Associates) requests a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign for Lot E1A2, Panorama Heights Addn, located at 9999 Lomas BLVD NE, zoned MX-M [Section 14-16-5-12(H)(2)(c)]

Special Exception No: VA-2020-00386
Project No: Project#2020-004669
Hearing Date: 12-15-20
Closing of Public Record: 12-15-20
Date of Decision: 12-30-20

On the 15th day of December, 2020, Garcia/Kraemer & Associates, agent for property owner Charter Schools Solutions (“Applicant”) appeared before the Zoning Hearing Examiner (“ZHE”) requesting a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign (“Application”) upon the real property located at 9999 Lomas BLVD NE (“Subject Property”). Below are the ZHE’s finding of fact and decision:

**FINDINGS:**

1. Applicant is requesting a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign.
2. The City of Albuquerque Integrated Development Ordinance, Section 14-16-6-6(N)(3)(a) (Variance-Review and Decision Criteria) reads: “… an application for a Variance-ZHE shall be approved if it meets all of the following criteria:
   (1) There are special circumstances applicable to the subject property that are not self-imposed and that do not apply generally to other property in the same zone and vicinity such as size, shape, topography, location, surroundings, or physical characteristics created by natural forces or government action for which no compensation was paid. Such special circumstances of the property either create an extraordinary hardship in the form of a substantial and unjustified limitation on the reasonable use or return on the property, or practical difficulties result from strict compliance with the minimum standards.
   (2) The Variance will not be materially contrary to the public safety, health, or welfare.
   (3) The Variance does not cause significant material adverse impacts on surrounding properties or infrastructure improvements in the vicinity.
   (4) The Variance will not materially undermine the intent and purpose of the IDO or the applicable zone district.
   (5) The Variance approved is the minimum necessary to avoid extraordinary hardship or practical difficulties.”
3. The Applicant has authority to pursue this Application.
4. Applicant bears the burden of ensuring there is evidence in the record supporting a finding that the above criteria are met under Section 14-16-6-4(N)(1).
5. Agent appeared and gave evidence in support of the application.
6. All property owners within 100 feet of the subject property and the affected neighborhood association were notified.
7. The subject property is currently zoned MX-M.
8. Section 14-16-5-12(H)(2)(c) specifically prohibits electronic signs within 660 feet of the outer edge of Tramway.
9. Approval of the variance would materially undermine the intent and purpose of the IDO.
10. Given that criterion (4) in Section 14-16-6-6(N)(3)(a) (Variance-Review and Decision Criteria) has not been satisfied, the variance must be denied, and it is therefore unnecessary to examine any other element required to establish a variance.

DECISION:

DENIAL of a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign.

APPEAL:

If you wish to appeal this decision, you must do so by January 15, 2021 pursuant to Section 14-16-6-4(U), of the Integrated Development Ordinance, you must demonstrate that you have legal standing to file an appeal as defined.

Successful applicants are reminded that other regulations of the City must be complied with, even after approval of a special exception is secured. This decision does not constitute approval of plans for a building permit. If your application is approved, bring this decision with you when you apply for any related building permit or occupation tax number. Approval of a conditional use or a variance application is void after one year from date of approval if the rights and privileges are granted, thereby have not been executed, or utilized.

Albuquerque, New Mexico 87103

RE: Project #2019-003219: Appeal of VA-2020-00386- Charter Schools Solutions,
13201 Lomas Blvd NE

Dear Mr. Chavez:

This is an application to appeal the Zoning Hearing Examiner (“ZHE”)’s denial of a Variance request, dated December 30, 2020, for a proposed electronic sign on the school’s property. This office represents Charter Schools Solutions, property owner, (collectively, “Appellant” or “Applicant”) with respect to Charter School Solution’s renovation and construction project at the Albuquerque School of Excellence located at the above referenced address. This appeal is timely filed because it is filed prior to 5:00 p.m. on January 15, 2021, when the fifteen day appeal deadline expires. A copy of the ZHE Notification of Decision is attached hereto as Exhibit A. Appellant has standing to bring this appeal as Charter Schools Solutions is the property owner of record at the 13201 Lomas Blvd NE location. A letter of authorization from the property owner is enclosed. Mehmed Milanovic- Director of Facilities & Construction, Mustafa Ayik-Principal and Head Administrator, and Charter Schools Solutions are adversely affected by the ZHE’s decision.

**Background**

Appellant owns the 4.99 AC property on which the proposed electronic sign is to be located. The subject site is zoned MX-M, Mixed-use -Moderate Intensity Zone District. In 1995 the property was developed as an Albertson’s grocery store, which after many years closed and the property and building then became vacant. In 2011 the Albuquerque School of Excellence moved into the old Albertson’s location to operate as a K-12 college preparatory public charter school. Since opening, the school’s student enrollment numbers have more than doubled in size.

The application before the ZHE was for a variance of 120’ to the minimum required 660’ (1/8 mile) distance from the edge of Tramway Blvd right-of-way to allow for a 55 sq. ft. electronic sign. As shown on the sign elevation rendering that was submitted with the
The ZHE application, the proposed sign is relatively small and located below the school’s larger, static, free-standing sign, which shows the name and logo of the school. The proposed free-standing sign (including the smaller electronic sign) is to replace the old Albertson’s sign that was demolished - which was both in substandard condition and exceeded today’s allowed sign size. Due to the exceptionally large lot and the location being along Lomas Blvd NE, where there are no restrictions or limitations for electronic signs, the proposed electronic sign could be located on the property outside of the 660’ distance requirement; however, based on the existing location of the school’s vehicular ingress/egress onto Lomas Blvd. that was established almost 30 years ago, practical difficulties result from the strict compliance with the minimum standards. These practical difficulties were both described in the justification letter and discussed in detail during testimony at the ZHE public hearing.

The ZHE’s Decision in This Matter Constituted an Abuse of Discretion and Went Outside His Scope of Authority

The ZHE abused his discretion when he denied this application for a variance. An abuse of discretion is established if the agency or lower court has not proceeded in the manner required by law, the order or decision is not supported by the findings, or the findings are not supported by the evidence. The ZHE ignored the applicant’s testimony and evidence given with the application documents and at the hearing regarding the variance. Rather than objectively weigh the evidence presented in the application and at the hearing for meeting the criteria for a variance approval, the ZHE chose to focus and place considerable weight on the question of whether a variance to the 660’ dimension could be even considered if electronic signs are “prohibited”. On the record, the agent testified to the validity of the variance request - summarizing that, the IDO definition of a “variance” allows exceptions to dimensional standards of the regulations, but that an allowable “use” may never be changed through a variance. And since electronic signs are already an allowed “use” in the MX-M zone, that this variance request should be allowed to proceed for an exception to the dimensional standard of 660’ pursuant to the definition of a variance. Also, there is no dispute that electronic signs are an allowed use in the MX-M zone, so the applicant was not asking for the ZHE to approve a use that is not allowable. Furthermore, at the hearing, the ZHE was informed by both the agent and the ZHE Planner of a previous variance case (17ZHE-80070/project# 1011201) that was heard and approved for an exception to the same dimensional standard of the 660’ minimum distance away - in that case from Rio Grande Blvd NW. It is apparent that the ZHE ignored this evidence and chose to still put significant weight on the validity of the variance request instead. The appellant believes that this constitutes an abuse of discretion and that the ZHE went outside his scope of authority in denying the application when he was fully aware that there was already a previous ZHE case regarding the issue at hand but undeniably chose to ignore this evidence presented.

Additionally, the ZHE’s finding essentially amounts to a single conclusory statement- “Approval of the variance would materially undermine the intent and purpose of the IDO” (ZHE Decision of 12-30-20- Findings, #9) showing that the decision is not only unfounded on the Record, but is contrary to logic and reason- It is inevitable that the
development on the Property will involve the use of signs, and in the MX-M zone anywhere along Lomas Blvd, electronic signs are allowed except in this case along the eastern portion of the school property and within 660’ of Tramway Blvd ROW. If located on the western portion of the lot, the electronic sign only requires a sign permit. It is contrary to logic and reason to conclude that the variance would undermine the intent and purpose of the IDO when the proposed sign can be legally on the property without a variance and the ZHE failed to specify the basis on which the ruling was made. Under the IDO General Provisions 14-16-1 the “Purpose” of the IDO- reference 14-16-1-3, contains twelve subsections (A) thru (L), none of which are cited in the justification given by the ZHE, further establishing an abuse of discretion since the decision is not supported by the findings.

The ZHE Erred in Applying Adopted City Plans, Policies, and Ordinances in Arriving at the Decision

As explained above, the ZHE failed to take into consideration adopted elements of the IDO, specifically the definition of a “variance”- Reference 14-16-7-1. There is no analysis or explanation that was given in the ZHE “Findings” as to why the application “undermined the intent and spirit of the IDO” It is clear that the IDO definition of a variance states “The allowable use of premises may never be changed via a variance” but what is also evident in other sections of the IDO, that based on the definition, would not allow a variance to a dimension is only when the language specifically states that “this use is prohibited” rather than the use being allowed- not prohibited, but with dimensional constraints such as the 660’ in this case. Appellant believes that for this reason the ZHE erred in considering the adopted elements of the IDO which resulted in the denial of their application for variance approval.

The ZHE decision is contrary to adopted City plans, policies, and ordinances, and should be set aside.

The ZHE’s Decision was Arbitrary and Capricious And Should be Reversed

In his ruling, the ZHE ignored the testimony of the applicant and the evidence presented in the application and at the hearing. Appellant believes that with no explanation or analysis by the ZHE that shows how he arrived at his conclusion and decision, that the ZHE acted with unreasoned action without proper consideration in disregard for the facts and circumstances. In his ruling, the ZHE failed to specify the basis on which the ruling was made, including naming any injury that would be caused or citing any of the twelve provisions – subsections 1-3(A) thru 1-3(L) of the IDO’s “Purpose” 14-16-1-3, which according to Findings #9 of the ZHE decision, this section was the reason for denial of the variance. The ZHE failed to specify in his Findings and Conclusions the basis for the denial of the application, except to make the unsupported, cursory conclusion:

“Approval of the variance would materially undermine the intent and purpose of the IDO”
Based upon the foregoing, it is entirely evident that the ZHE simply disregarded, without comment or analysis, the contrary evidence in the Record and concluded, with no supporting evidence or analysis, that he would simply deny the application.

In order for the LUHO to properly review the decision, the ZHE is required to connect statements of fact and evidence to his “Findings and Conclusions”. This he did not do. There is no connection between the application, testimony, and evidence submitted and the decision that the request would undermine the intent and purpose of the IDO.

For these reasons, appellant believes that the ZHE’s decision was arbitrary and capricious because without any explanation or analysis of the facts, it provides no rational connection between the facts found and the choices made, or entirely omits consideration of relevant factors or important aspects of the problem at hand. New Mexico Courts have determined that action by a governmental body must not be arbitrary and capricious. The ZHE provided no reasoning, guidance, or instructions for his decision beyond the brief Findings and Conclusions in the Notification of Decision, in spite of the Record being replete with reasons why the applicant had addressed all of the criteria for a variance approval. Rather, he seems to have based the denial on the use of the word “prohibited” in the IDO regulations for electronic signs within 660’ of Tramway Blvd. This rendered the ZHE’s decision inappropriate, and yet another reason why it should be reversed.

**Conclusion**

For the reasons given above, and those to be presented at the LUHO hearing, the Appellants respectfully request that the LUHO reverse the decision of the ZHE in this matter. In the event that the LUHO is disinclined to reverse the ZHE decision, we respectfully request that the case be remanded back to the ZHE for another hearing at which reconsideration of the facts, additional evidence, and new testimony from the school staff, parents, and neighbors who support the variance request may be introduced.

Your attention to this matter is greatly appreciated.

Sincerely,

Jonathan Turner

Garcia/Kraemer and Associates

Cc: Albuquerque School of Excellence
Charter Schools Solutions (Agent, Garcia/Kraemer & Associates) requests a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign for Lot E1A2, Panorama Heights Addn, located at 99999 Lomas BLVD NE, zoned MX-M [Section 14-16-5-12(H)(2)(c)]

Special Exception No:............. VA-2020-00386
Project No: ..................... Project#2019-003219
Hearing Date: .................... 12-15-20
Closing of Public Record: ...... 12-15-20
Date of Decision: ................. 12-30-20

On the 15th day of December, 2020, Garcia/Kraemer & Associates, agent for property owner Charter Schools Solutions (“Applicant”) appeared before the Zoning Hearing Examiner (“ZHE”) requesting a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign (“Application”) upon the real property located at 99999 Lomas BLVD NE (“Subject Property”). Below are the ZHE’s finding of fact and decision:

**FINDINGS:**

1. Applicant is requesting a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign.
2. The City of Albuquerque Integrated Development Ordinance, Section 14-16-6-6(N)(3)(a) (Variance-Review and Decision Criteria) reads: “… an application for a Variance-ZHE shall be approved if it meets all of the following criteria:
   (1) There are special circumstances applicable to the subject property that are not self-imposed and that do not apply generally to other property in the same zone and vicinity such as size, shape, topography, location, surroundings, or physical characteristics created by natural forces or government action for which no compensation was paid. Such special circumstances of the property either create an extraordinary hardship in the form of a substantial and unjustified limitation on the reasonable use or return on the property, or practical difficulties result from strict compliance with the minimum standards.
   (2) The Variance will not be materially contrary to the public safety, health, or welfare.
   (3) The Variance does not cause significant material adverse impacts on surrounding properties or infrastructure improvements in the vicinity.
   (4) The Variance will not materially undermine the intent and purpose of the IDO or the applicable zone district.
   (5) The Variance approved is the minimum necessary to avoid extraordinary hardship or practical difficulties.”
3. The Applicant has authority to pursue this Application.
4. Applicant bears the burden of ensuring there is evidence in the record supporting a finding that the above criteria are met under Section 14-16-6-4(N)(1).

5. Agent appeared and gave evidence in support of the application.

6. All property owners within 100 feet of the subject property and the affected neighborhood association were notified.

7. The subject property is currently zoned MX-M.

8. Section 14-16-5-12(H)(2)(c) specifically prohibits electronic signs within 660 feet of the outer edge of Tramway.

9. Approval of the variance would materially undermine the intent and purpose of the IDO.

10. Given that criterion (4) in Section 14-16-6-6(N)(3)(a) (Variance-Review and Decision Criteria) has not been satisfied, the variance must be denied, and it is therefore unnecessary to examine any other element required to establish a variance.

DECISION:

DENIAL of a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign.

APPEAL:

If you wish to appeal this decision, you must do so by January 15, 2021 pursuant to Section 14-16-6-4(U), of the Integrated Development Ordinance, you must demonstrate that you have legal standing to file an appeal as defined.

Successful applicants are reminded that other regulations of the City must be complied with, even after approval of a special exception is secured. This decision does not constitute approval of plans for a building permit. If your application is approved, bring this decision with you when you apply for any related building permit or occupation tax number. Approval of a conditional use or a variance application is void after one year from date of approval if the rights and privileges are granted, thereby have not been executed, or utilized.

October 19, 2020

Dear Neighborhood representatives,

I, Jonathan Turner, am the agent for Charter Schools Solutions who owns the property located at 13201 Lomas Blvd NE Albuquerque, NM 87112. The property is currently occupied and operating as the Albuquerque School of Excellence.

Pursuant to the 2018 City of Albuquerque Integrated Development Ordinance, we are requesting approval from the Zoning Hearing Examiner for a variance of approximately 120 ft. to the required 1/8 mile distance away from the edge of Tramway Blvd for a proposed LED sign that will be smaller and underneath a new free-standing non-digital sign for the school. It is the school’s intent to redo and reconfigure all of their signs and replace them with newer more weather resistant materials and bring the signs up to current day City codes. The proposed LED sign will be used by the school to display the time and temperature, and will also allow the school to show messages to inform students, parents, and the general public of the school’s schedule, PTA meetings, inclement weather closures, and the like. The sign will actually be located on Lomas Blvd- and not along Tramway Blvd. Although every effort was made to locate the new sign further away from Tramway, the school has been challenged by physical obstacles and existing building locations that have limited any other logical location of the sign on the property. The proposed sign has the modern technology to allow the school to completely control the display and brightness, and the school fully intends to comply with the City IDO sign regulations and the NM Night Sky Protection Act.

This letter will serve as an offer to meet with you to provide additional information regarding the applicant’s variance request. If you wish to meet, please respond within 15 days. If you do not want to meet, or you support the proposal, please let me know.

A ‘remote’ hearing via Zoom will be held on December 15th, 2020 beginning at 9:00 AM. The agenda and information for the zoom ZHE hearing will be posted on the City website and is still forthcoming. For more information, please contact the ZHE Administrative Assistant Suxie Sanchez at 505-924-3894 or suzannasanchez@cabq.gov. Also, please feel free to contact me directly with any questions or concerns pertaining to this request at (505) 440-1524.

On behalf of the Albuquerque School of Excellence, thank you in advance for your consideration and community spirit in their effort to develop and improve their property within the Embudo Canyon neighborhood.

Sincerely,

Jonathan Turner

Jonathan Turner
November 2, 2020

Mr. Robert Lucero, Esq.
Zoning Hearing Examiner
Planning Department
P.O. Box 1293
Albuquerque, New Mexico 87103

RE: 13201 Lomas Blvd NE

Dear Mr. Lucero:

This is a request for approval of a Special Exception, pursuant to section 14-16-6-6(N) of the Albuquerque Integrated Development Ordinance to allow for a proposed electronic LED sign at the above referenced address. Attached with this application is a site plan that clearly indicates the location of the proposed sign. The variance hereby being requested with this application is as follows:

1. A variance of 120 feet to the minimum required 660 ft. (1/8 mile) distance from the outer edge of Tramway Blvd. right-of-way - for a proposed electronic sign.

-Reference section 14-16-5-12(H)(2)(c) of the Integrated Development Ordinance (IDO).

**Background**

The subject property is home to the Albuquerque School of Excellence 4.99 AC campus. The school currently occupies 2 main buildings with approximately 96,000 square feet of total building area. The property is located within the city limits and is zoned MX-M, Mixed-Use Moderate Intensity. Since purchasing the property, the owners- Charter Schools Solutions, have been renovating and transforming the old Albertson’s grocery store into a modern and successful K thru 12 college prep, tuition-free, Charter School. The school recently completed construction of a new 2 story 43,500 square foot building to accommodate the school’s successful growth. All related improvements and infrastructure have been completed with the campus expansion, and now the school is nearing completion of a total renovation of the original Albertson’s building that was built in 1995.
Adjacent Land Uses and Zoning

The site is located off of Tramway Rd NE on Lomas Blvd NE on the north side of the road. The property is located on zone atlas map page K-22 and is within an Area of Change in the Comprehensive Plan. The land use and zoning of adjacent properties is both commercial and moderate density residential townhomes and multi-family, the US Post Office is directly to the West and the Lomas Tramway Public Library is to the South of the school.

Reason for Request

As mentioned above, the school is currently continuing to make improvements to the campus and property. One of the last projects left to complete is the relocation and upgrading of the schools free-standing sign. The upper main portion of the new sign is proposed to be a 120 square foot static (non-electronic) sign, and below the static sign the school would like to install a 55 square foot electronic sign for school messages and time/temperature display. However, due to the physical layout of the school campus buildings, parking lot, and new playground, the sign location is most logical and practical to be located between the 2 buildings and in front of the children’s playground. Unfortunately, although located on Lomas not Tramway, the large static sign is permissive but the smaller electronic sign is location is within the 660 ft. Tramway electronic sign buffer which does not allow it. Based on the shape and size of the subject lot and the location of the existing reclaimed grocery store building, a variance of 120 ft. to the 660 ft. distance away from Tramway Blvd is required. Every effort was made by the architects to locate the sign in an area that would provide visibility but would not impact traffic circulation or hinder clearances with the building.

A variance application shall be approved by the Zoning Hearing Examiner, if it meets all of the following criteria:

(1)- There are special circumstances applicable to the subject property that are not self-imposed and that do not apply generally to other property in the same zone district and vicinity, including but not limited to size, shape, topography, location, surroundings, and physical characteristics, and such special circumstances were created either by natural forces or by government eminent domain actions for which no compensation was paid;

There are special circumstances which are applicable to the subject property for the following reasons:

1. The location and size of the property are unique since the parcel is the largest commercially zoned property in the vicinity and it does not abut Tramway Blvd NE but in fact it abuts Tramway Rd. to the East which is a stub street off of Tramway Blvd.

2. There are also special circumstances applicable to the subject property since: a) the original location of the school’s entrance and historical layout of the site is oriented towards Lomas Blvd, which allows electronic signs without a distance from R.O.W. restriction like Tramway Blvd. b) The lot is not square and is widest at the east along
Tramway Rd. (approx. 365’), then becomes narrower going to the west end of the lot (approx. 325’)

(2)- The Variance will not be materially contrary to the public safety, health, or welfare:

The variance, if approved, will allow the school to use the digital sign as a beneficial tool to inform students, parents, and the general public with important and useful information. A large school such as the Albuquerque School of Excellence can especially benefit from the ability use the message center because hundreds of children, staff, and parents can be informed in an instant and from a long distance away. We believe that these benefits will help contribute to public safety and the safety of students and staff by being able to quickly and efficiently display critical information during an emergency when time is of the essence or health is at stake. For these reasons, health and welfare will also be improved and strengthened with this request and approval of the variance, especially now with the COVID-19 immediate response measures that the school employs and takes very seriously. It is important to note that public safety, health and welfare are of utmost importance to the operation of a school, and The Albuquerque School of Excellence is no exception.

(3)- The Variance does not cause significant material adverse impacts on surrounding properties or infrastructure improvements in the vicinity:

As stated above, approval of the variance requested will allow the school to relay important messages and communications on the school campus and to the general public. We believe that the use of modern day technology through electronic signage will have positive impacts on surrounding properties because of the benefits of providing information. Finally, it also important to note that the infrastructure improvements in this area have been completed and are established; therefore we do not believe be there to be adverse impacts when there are no infrastructure improvements that could be impacted.

(4)- The Variance will not material undermine the intent and purpose of this IDO or the applicable zone district:

The variance will not material undermine the intent and purpose of the IDO or the applicable zone district. In fact, the variance, will as stated above, allow the school to make continued improvements to the property which furthers the purpose and intent of the IDO since the request will:

1. Protect the quality and character of residential neighborhoods.
   -The school’s investment in redeveloping and renovating their property is intended to create a safer, better-quality campus environment for the school with the intent of complying with all electronic sign regulations and controls if approved. Compliance with the IDO sign regulations will help ensure the protection of the quality and character of residential neighborhoods.

2. Provide for the efficient administration of City land use and development regulations.
-If the variance is granted, the proposed sign is to be submitted for approval through the Planning Department’s development approval process. It is the applicant’s intention to maintain compliance with all other regulations and standards of the IDO and the Building Code.

3. Protect the health, safety, and general welfare of the public.
   -As mentioned directly above, this project will be Code Compliant with all City requirements which will help promote and improve the health, safety, and general welfare of the public since the current day sign regulations were written to provide these protections for the public.

4. Provide reasonable protection from possible nuisances and hazards and to otherwise protect and improve public health.
   -For the reasons previously stated above, the school’s intentions are to utilize the electronic sign to improve and protect public health -especially during the Covid-19 pandemic.

5. Ensure that all development in the City is consistent with the spirit and intent of any other plans and policies adopted by City Council.
   -As mentioned above, compliance with all other sign regulations will promote consistency with the spirit of the IDO and other applicable regulations that have been adopted by City Council.

(5) The Variance approved is the minimum necessary to avoid extraordinary hardship or practical difficulties:

If approved, the variance requested will relieve the unnecessary hardship on the current owners of being able to install a relatively small electronic sign on their property. The amount of variance being sought is the minimum necessary to overcome the practical difficulties; since, there is no other area on the property to logically place a free-standing sign because of the more narrow width of the lot at the West side of the property. Finally, the sign location as proposed will allow it to not be blocked from view by the buildings and will allow it to be seen and read more easily by passersby, parents, students, staff and motorists on Lomas Blvd. Locating the sign further West outside of the buffer would not be practical because it would have to be located in the parking area or worse, the busy student drop-off entrance/exit area would be compromised. A variance approval would be the minimum necessary to avoid extraordinary hardship - and practical difficulties.

Neighborhood Notification

The Embudo Canyon N.A. and the East Gateway Coalition of Neighborhoods were notified of this application and offered a meeting. Additionally, we offered to discuss the variance request by email or telephone in case the Coalition or Association had questions or concerns. As of this date no communication has been received from the Embudo Canyon N.A. nor the East Gateway Coalition.
Conclusion

Therefore, for the reasons stated above, we respectfully request that the Zoning Hearing Examiner approve this application for the variance requested. Approval of this request will enable the Albuquerque School of Excellence to make a reasonable use of their property while also enhancing the current site within the neighborhood with a more functional sign that is capable of providing a variety of useful information for the school and the general public. Furthermore, approval of the variance would help "level" the playing field by allowing an exception for a Charter school to have an electronic sign that would otherwise be permissive on any APS school property without a variance, since State of NM (Board of Education) properties are not subject to these regulations. We also believe that the proposed variance is not in conflict with area plans or policies but in fact is in harmony and within the intent and spirit of the Albuquerque Integrated Development Ordinance. Thank you for your time and consideration in this matter.

Sincerely,

Jonathan Turner

Garcia/Kraemer and Associates
SIGN POSTING AGREEMENT

REQUIREMENTS

POSTING SIGNS ANNOUNCING PUBLIC HEARINGS

All persons making application to the City under the requirements and procedures established by the Integrated Development Ordinance are responsible for the posting and maintaining of one or more signs on the property which is subject to the application, as shown in Table 6-1-1. Vacations of public rights-of-way (if the way has been in use) also require signs. Waterproof signs are provided at the time of application for a $10 fee per sign. If the application is mailed, you must still stop at the Development Services Front Counter to pick up the sign(s).

The applicant is responsible for ensuring that the signs remain posted throughout the 15-day period prior to any public meeting or hearing. Failure to maintain the signs during this entire period may be cause for deferral or denial of the application. Replacement signs for those lost or damaged are available from the Development Services Front Counter.

1. LOCATION
   A. The sign shall be conspicuously located. It shall be located within twenty feet of the public sidewalk (or edge of public street). Staff may indicate a specific location.
   E. The face of the sign shall be parallel to the street, and the bottom of the sign shall be at least two feet from the ground.
   C. No barrier shall prevent a person from coming within five feet of the sign to read it.

2. NUMBER
   A. One sign shall be posted on each paved street frontage. Signs may be required on unpaved street frontages.
   B. If the land does not abut a public street, then, in addition to a sign placed on the property, a sign shall be placed on and at the edge of the public right-of-way of the nearest paved City street. Such a sign must direct readers toward the subject property by an arrow and an indication of distance.

3. PHYSICAL POSTING
   A. A heavy stake with two crossbars or a full plywood backing works best to keep the sign in place, especially during high winds.
   B. Large headed nails or staples are best for attaching signs to a post or backing; the sign tears out less easily.

4. TIME
   Signs must be posted from **NOV 30, 2020** to **DEC 15, 2020**

5. REMOVAL
   A. The sign is not to be removed before the initial hearing on the request.
   B. The sign should be removed within five (5) days after the initial hearing.

I have read this sheet and discussed it with the Development Services Front Counter Staff. I understand (A) my obligation to keep the sign(s) posted for (15) days and (B) where the sign(s) are to be located. I am being given a copy of this sheet.

Subject: COMMENTS FOR THE ZHE HEARING OF December 15, 2020

The Transportation Development Review Services Section has reviewed the zone hearing requests, and submits the attached comments.

---

VA-2020-00386 PR-2020-004669

Address: 13201 Lomas Blvd. NE

Transportation Review: No objections

After review of the provided application, Transportation has no objection to the variance request for an electronic sign.
City of Albuquerque ZHE – December 15, 2020

Agenda Item #23 VA-2020-00386 PR-2019-004669

Charter Schools Solutions (Agent, Garcia/Kraemer & Associates) requests a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign for Lot E1A2, Panorama Heights Addn, located at 99999 Lomas BLVD NE, zoned MX-M [Section 14-16-5-12(H)(2)(c)]

Ownership: Owner: CHARTER SCHOOLS SOLUTIONS

Zone District/Purpose: MX-M/ The purpose of the MX-M zone district is to provide for a wide array of moderate-intensity retail, commercial, institutional and moderate-density residential uses, with taller, multi-story buildings encouraged in Centers and Corridors

Allowable Use: n/a

Applicable Comp Plan Designation(s): Area of Change; Lomas MT

Applicable Overlay Zones: None listed

Applicable Use-Specific Standard(s): n/a

Applicable Dimensional/Development Standards:
5-12(H)(2) Prohibited Areas
Electronic signs are prohibited in the following areas, as noted.
5-12(H)(2)(c) Within 660 feet of the outer edge of the public right-of-way of the following streets: 4. Tramway Boulevard.

Old Code: 5-12(H)(2)(c) Electronic signs are prohibited within 1/8 mile (660 feet) of the outer edge of the right-of-way of the following streets: Alameda Boulevard, Griegos Road, Rio Grande Boulevard, Tramway Boulevard, and Unser Boulevard.

Traffic Recommendations: No objection

Planning Recommendation: This matter should proceed to a public hearing where the Zoning Hearing Examiner will hear additional evidence and make a written decision pursuant to applicable provisions of Section 14-16-6-4.
Charter Schools Solutions (Agent, Garcia/Kraemer & Associates) requests a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign for Lot E1A2, Panorama Heights Addn, located at 99999 Lomas BLVD NE, zoned MX-M [Section 14-16-5-12(H)(2)(c)].

Special Exception No: VA-2020-00386
Project No: Project#2020-004669
Hearing Date: 12-15-20
Closing of Public Record: 12-15-20
Date of Decision: 12-30-20

On the 15th day of December, 2020, Garcia/Kraemer & Associates, agent for property owner Charter Schools Solutions (“Applicant”) appeared before the Zoning Hearing Examiner (“ZHE”) requesting a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign (“Application”) upon the real property located at 99999 Lomas BLVD NE (“Subject Property”). Below are the ZHE’s finding of fact and decision:

**FINDINGS:**

1. Applicant is requesting a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign.
2. The City of Albuquerque Integrated Development Ordinance, Section 14-16-6-6(N)(3)(a) (Variance-Review and Decision Criteria) reads: “… an application for a Variance-ZHE shall be approved if it meets all of the following criteria:
   (1) There are special circumstances applicable to the subject property that are not self-imposed and that do not apply generally to other property in the same zone and vicinity such as size, shape, topography, location, surroundings, or physical characteristics created by natural forces or government action for which no compensation was paid. Such special circumstances of the property either create an extraordinary hardship in the form of a substantial and unjustified limitation on the reasonable use or return on the property, or practical difficulties result from strict compliance with the minimum standards.
   (2) The Variance will not be materially contrary to the public safety, health, or welfare.
   (3) The Variance does not cause significant material adverse impacts on surrounding properties or infrastructure improvements in the vicinity.
   (4) The Variance will not materially undermine the intent and purpose of the IDO or the applicable zone district.
   (5) The Variance approved is the minimum necessary to avoid extraordinary hardship or practical difficulties.”
3. The Applicant has authority to pursue this Application.
4. Applicant bears the burden of ensuring there is evidence in the record supporting a finding that the above criteria are met under Section 14-16-6-4(N)(1).
5. Agent appeared and gave evidence in support of the application.
6. All property owners within 100 feet of the subject property and the affected neighborhood association were notified.
7. The subject property is currently zoned MX-M.
8. Section 14-16-5-12(H)(2)(c) specifically prohibits electronic signs within 660 feet of the outer edge of Tramway.
9. Approval of the variance would materially undermine the intent and purpose of the IDO.
10. Given that criterion (4) in Section 14-16-6-6(N)(3)(a) (Variance-Review and Decision Criteria) has not been satisfied, the variance must be denied, and it is therefore unnecessary to examine any other element required to establish a variance.

DECISION:

DENIAL of a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign.

APPEAL:

If you wish to appeal this decision, you must do so by January 15, 2021 pursuant to Section 14-16-6-4(U), of the Integrated Development Ordinance, you must demonstrate that you have legal standing to file an appeal as defined.

Successful applicants are reminded that other regulations of the City must be complied with, even after approval of a special exception is secured. This decision does not constitute approval of plans for a building permit. If your application is approved, bring this decision with you when you apply for any related building permit or occupation tax number. Approval of a conditional use or a variance application is void after one year from date of approval if the rights and privileges are granted, thereby have not been executed, or utilized.

Hearing on Special Exceptions
to the Integrated Development Ordinance

MINUTES

December 15, 2020
600 2nd St NW, Albuquerque, NM 87102

CITY STAFF PRESENT:

Robert Lucero – Zoning Hearing Examiner
Lorena Patten-Quintana – ZHE Planner, Planning Department
Suzie Sanchez – Hearing Monitor
ZHE: I understand that you’re the agent for the next agenda item as well. That’s agenda item number 23, VA-2020-00386, project number PR-2020-004669, Charter School Solutions, agent, Garcia/Kraemer and Associates, request a variance of 120 feet to the minimum required 660-foot distance from the outer edge of Tramway Blvd right of way for a proposed electronic sign for Lot E1A2, Panorama Heights Addn, located at 99999 Lomas BLVD NE, zoned MX-M. And, I’ll note for the record that Mr. Turner, Johnathan Turner has already been sworn in. Go ahead Mr. Turner, five minutes, please.

JOHNATHAN TURNER: Thank you, Mr. Lucero. Johnathan Turner, agent on behalf of Charter School Solutions for the variance request.

ZHE: Mr. Turner? Something changed on your end. Your voice sounds a little distorted.

JOHNATHAN TURNER: Okay.

ZHE: I just want to make sure we have a clean recording for the record. Let’s see, it looks like you’re muted there.

JOHNATHAN TURNER: There we go. Does this sound any better or different? Or is it the same?

ZHE: It’s a little clearer but it’s still - - it’s sort of like you’re talking - - I don’t know - - it’s like a very thin - - but I can understand you clearly.

JOHNATHAN TURNER: Okay, if you need me to repeat myself, please let me know.

ZHE: Okay, I sure will.

JOHNATHAN TURNER: Okay. I - - Of course, I can’t hear myself so, I don’t know. So, just let me know. So, this, this request, Mr. Lucero, is for the Charter School Solutions which owns and operates this school of, Albuquerque School of Excellence. There is actually an address on the property, it’s 13201 Lomas Boulevard Northeast. That is the address known to the public for the Albuquerque School of Excellence. The City GIS has half of the property on a different City parcel and so the - - that is the reason why there is no address, because the Zoning office decided to use the unaddressed parcel. And, so, this is known under 13201 Lomas Boulevard Northeast and the variance is for 120 feet distance, a variance to the minimum eighth mile or 660 feet distance from the edge of the right-of-way from Tramway for a proposed electronic sign. The site plan that was submitted along with the elevation of the sign does show the proposed sign and the electronic sign that is just below the static sign that will be installed by the school. The property is actually on the corner of Lomas and Tramway, I believe it is Road. It’s not actually on Tramway but we are subject to those regulations and therefore we’re asking for a variance to that distance. The property does have special circumstances as addressed in the justification letter. Mainly, as we discussed, the size of the lot and also the shape of it as it becomes more narrow moving towards the main entrance of the property, which is where the sign location is
proposed; we believe does create a hardship and in addition, the photos that were submitted for the record, I’m hoping you got those, Mr. Lucero?

ZHE: Yes.

JOHNATHAN TURNER: Those photos, where the yellow ZHE sign is posted onto the building, that is a new building that the school has built, you know, for the students, for the school expansion. That building flanks one side of the playground and the other side of it is the old Albertson’s Grocery Store. That was the previous use of the school building. That area in between - - and also, is also shown on the site plan, the playground, which is actually under construction, is the location for the sign. The owner/applicant could move the sign just to the 120-foot mark just to stay out of the 1/8 mile distance from Tramway, however, that puts the sign right in the entrance way, which is always been used off of Lomas, for the grocery store and now the school. That puts the sign right in that area and as explained in the justification letter, that does create a hardship because it, it wouldn’t be a safe place to put the sign and it also wouldn’t be as visible from Lomas Boulevard. So, as explained in the letter, the, the sign will comply with the IDO regulations for brightness, for a foot handle above natural ambient light, that I think is very important because the regulation that prohibits electronic signs from Tramway and other streets throughout the City - - the purpose for those regulations, that were done in the late, I think about 2010 or less - - City Council and a team from Planning created these regulations for electronic signs - - because at the time, and still currently, there are a lot of electronic signs for businesses that are extremely bright, they have a very bright colored background and when they turn those - - rather, turn a message on, that bright background comes up at you. At nighttime, it can be blinding. And, there were several signs prior to enacting the regulation against electronic signs that were dangerous and City Zoning had to enforce and have the brightness lowered to be in compliance and to not blind drivers. Tramway is, for the most part, a dark street at nighttime and so are the other streets that are regulated by this, the electronic sign regulation of a 1/8 mile. It is Rio Grande, Unser, Tramway, those streets historically and even currently are dark streets. And, so, when City Council and Planning got together and formed a task force to decide how they can control these, these blinding signs, there were problematic in certain areas of the City, especially on dark streets. The 1/8th mile regulation came into effect for an electronic sign. So, having said that, the proposed sign is fairly small, it’s about 50 square feet and we do believe that we will comply, if the variance is approved with the intent of that ordinance and that is to have control of the sign and that can be done remotely by a computer. And, to not have it blinding to traffic, number one. And, also not to have fugitive light that affects neighboring properties. Most importantly is, for blinding traffic, I think that was the main concern when Planning and City Council got together and created these regulations but also fugitive light needs to be addressed and controlled. This proposed sign will be visible to traffic going up and down Lomas. You might be able to see it crossing the intersection of Lomas and Tramway, kind of with the blink of an eye, if you look down Lomas as you’re going down Tramway. But, the intent is to have it facing and informing traffic on Lomas, which Lomas does not, is not a street that prohibits electronic signs within an 1/8th mile of the right-of-way. So, we
do believe that also with the special circumstances of the location of the lot, that, that helps further compliance and meeting the intent of the reasons why electronic signs in very dark areas on Tramway would not be allowed. There - - it is also important - -

ZHE: I have a question.

JOHNATHAN TURNER: Yes?

ZHE: First of all, I really appreciate the thorough submittal and your testimony and explanations today but, I had a question about the IDO and sort of your reading of it and submitting this application because you know, looking at 5-12(h)(2) Electronic Signs, Prohibited Areas, it says “Electronic signs are prohibited in the following areas.” And so, I guess my question is, you know, can I give a variance to - - can a variance be granted to something that’s prohibited? You know, it seems like it’s a use prohibition, not a distance. Generally, when you think of a variance, it’s a distance that’s varied, not a use but I wanted to get your - - give you an opportunity to address that question and that point.

JOHNATHAN TURNER: Thank you, Mr. Lucero, and I think that’s a good question. It - - and - - this has come up before. We worked on a case on an electronic sign on Rio Grande Boulevard, that was the first time that we got approved through a variance process for the 1/8th mile prohibition that I believe, I may be wrong on the address, I think it’s 1050 Rio Grande Boulevard Northwest. If the address is wrong, it’s the Best Western Hotel on Rio Grande and I-40. That was several years ago, we requested a variance and - - for a sign at that location - - very similar to the request being made today, that the sign could almost be located out of the, the 660 feet but not quite. I think my, you know, my answer to the question of whether or not you can get a variance to this regulation is that, you can because a variance, as you know, typically is to a dimensional standard and - - which is what we’re requesting. But, more importantly, a variance shall never allow a use that is not allowed. So, a use should never be allowed via a variance. A sign is a use and the sign - - signs are allowed. This is a type of sign and - - but we do believe that since the use is allowed, a free-standing sign is allowed, that a variance can be requested and as, as we did for the, the hotel on Rio Grande, which was approved, we do think that that’s something that can be approved. It’s not changing the use of a property. It’s the type of sign and a free-standing sign is allowed at this location and it also is allowed to be illuminated. So, illumination, again, can be too bright on a static sign. I think the difference between an electronic sign is that, you can change what the sign says or the message without having to remove letters and put different letters up or different images, what have you. But, there’s still - - both signs, both signs - - they’re still signs and they’re still illuminated. One, in this case, the electronic sign can change remotely so, using a computer, sign company or the owner can make changes to that sign, including brightness and that’s important because you can be in violation of the brightness of the sign, according to the IDO. So, that I think, in a nutshell, that’s my answer. I believe it’s - - this type of request is legal and it does comply with the IDO in regards to a variance and what a variance is. The use is not going to be changed with approval of a variance so the use of a sign - - the type of sign would - -
ZHE: Could I ask you to address in a little more detail, the minimum necessary? Could you describe why this is the minimum necessary? The minimum variance necessary.

JOHNATHAN TURNER: Yes, as far as what we submitted for justification?

ZHE: Yes.

JOHNATHAN TURNER: Yes.

ZHE: It can’t be - - why can’t it be further I guess is the question.

JOHNATHAN TURNER: Oh, why can’t the sign be further away?

ZHE: Yeah.

JOHNATHAN TURNER: From?

ZHE: From Tramway?

JOHNATHAN TURNER: From the right-of-way. Because - - I’m looking to see - - you should have a site plan that you can - -

ZHE: It looks like the - -

JOHNATHAN TURNER: Now if you look at the - -

ZHE: Between the two - -

JOHNATHAN TURNER: If you look at the submitted site plan…

ZHE: Yes.

JOHNATHAN TURNER: With the proposed location - - so if we move the sign, down further, down Lomas, that either interferes with the corner of the building, which if you reference the photos that we submitted showing the posted yellow ZHE sign - -

ZHE: Oh, yes.

JOHNATHAN TURNER: That is a very narrow area to place it in and moreover, the sign would conflict with the wall of the building and so, if we pull it back a little bit further, just past the corner, there’s an L-shape there and that is a ponding area so, it is engineered as a large ponding area with rip, it’s called rip-wrap I believe and so that’s also a difficult place to put it and it would be blocked by the building. If we move it a little bit further, we are in the ingress, egress of the, the school. So, there’s, there’s, I believe there’s four lanes right there for traffic to come in and out of for the school, so that’s not a good area. And then, we get to the property line for the post office so, those areas could be - - I’m not sure if they could be reconfigured for the amount of traffic that’s required to enter and exit right there. But, again, if we’re closer to the corner of the building, it interferes with the building itself. And, there’s really not room to put a free-standing sign for the - - the static sign which is the School of Excellence sign and then the
smaller, electronic sign below. There’s just not enough room, so. The playground is the first logical place to put it and it does allow visibility mostly from traffic going east bound on Lomas.

ZHE: Yes.

JOHNATHAN TURNER: It’s actually somewhat blocked a little bit by the old Albertson’s building, looking at the site plan, so. You know, we think a variance would be the minimum necessary to overcome the hardship of moving that sign or tearing up the entrance and exit for the school.

ZHE: Good. Thank you, Mr. Turner. Let’s do this, because I feel like you’ve been very thorough in your submittals and I appreciate your testimony today. Let’s call for public comment and then we’ll give you another chance to respond if anyone likes to add any testimony.

JOHNATHAN TURNER: Thank you.

ZHE: So, thank you, Mr. Turner. So, again, everyone, this is agenda item 23, Charter Schools Solutions requesting a variance for a proposed electronic sign and it’s noticed as a Lomas address but it also has an address of, I’m sorry, 99999 but it has an address of 13201 Lomas. Please raise your hand if you’re here to speak on that matter. Again, this is agenda item 23. I’m scrolling through the participant list and I don’t see anyone raising their hand. Last call for agenda item 23. Okay, Mr. Turner, it doesn’t look like anyone’s here to put - - add any public comment. I’ll just give you one more minute if you had any last thing because I kind of felt like I cut you off there.

JOHNATHAN TURNER: No, you didn’t. Thank you. Mr. Lucero, I just want to mention that you know, looking closely at this property, having gone out there and visited it and seeing those physical obstacles that are prohibiting us and moving the sign to a workable location helps me, for one, understand what it’s like to be there, kind of what it would be like to live across the street from that school. The recent addition is architecturally - - it, it’s beautiful, it’s - - I think the school has done a great job in revitalizing the old Albertson’s Grocery Store and they’re, really successful with the school. It’s a college prep school. It’s - - They have a new building, they have new equipment. I think it benefits the public greatly by being there, you know. And, I have to look across the street and think about the neighbors that are gonna be really close to that sign and I just want to say for the record that most of the buildings across the street are multi-family and most of them have no windows on the wall that faces Lomas. So, it’s just a blank wall. So, it’s just a couple of units that do have some windows there, maybe even a balcony but the sign will be perpendicular to them. So, they probably won’t be able to see it. Now, and I also want to mention, two neighbors called me, Patsy Griffith, I believe her name was and a lady that lives in the Quail Run Subdivision, that is just North of the school and they wanted to know where the sign would be facing and just a little more information and we talked and they did not express opposition to the sign. These are residents that live just to the North of the school. They did have concerns about the school ringing bells on Saturday’s, that was kind of their biggest beef but they did understand that, how important a small message board like this can be for a
school and we looked at APS on how they use theirs for time and temperature but also to say if there’s an issue at the school or what the Covid status is, if it’s closed or open. And, as explained in the letter, passing on that information to not only the public but the school, children and parents and staff is super important in this day in age because we never know what kind of an issue a school might have and you’re not gonna know about it until maybe you watch the news at the end of the day. I think the benefits by having the sign to the school far out-weigh, you know, things about brightness, which will be controlled and would be in compliance. So, I just wanted to add that, that we did speak to two neighbors. I think we notified about 22 property owners and two called us and had those conversations. There was no opposition but we’re certainly sensitive to the neighbors right across the street and most of them, again, rent an apartment and there’s no windows. So, they can’t see the sign.

ZHE: Thank you, Mr. Turner. I appreciate you following up with the neighbors.

ZHE PLANNER: Pardon me, Robert?

ZHE: Yes?

ZHE PLANNER: I did locate the property at 1015 Rio Grande. I remember that. It was in May of 2017. And, I sent you the Notice of Decision for that. It was - - I’m concerned about the prohibition and that one was to replace an existing legally non-conforming sign in a non-residential area. So, I just wanted to alert you that you should have the NOD in your email.

ZHE: Okay, thank you.

ZHE PLANNER: You’re welcome.

ZHE: Mr. Turner, thank you for alerting us to that case.

JOHNATHAN TURNER: You’re welcome.

ZHE: Very good. Well, you know, I appreciate the submittals and your testimony. We do have quite a few items on the agenda so, we’re gonna go ahead and close the record on this one. Thank you, Mr. Turner, we’ll take it under consideration and issue the written decision in 15 days.

JOHNATHAN TURNER: Thank you.

ZHE: Have a great day.

JOHNATHAN TURNER: You too.

ZHE: So, that concluded agenda item 23.
NOTICE OF APPEAL

January 21, 2021

TO WHOM IT MAY CONCERN:

The Planning Department received an appeal on January 19, 2021. You will receive a Notice of Hearing as to when the appeal will be heard by the Land Use Hearing Officer. If you have any questions regarding the appeal please contact Alfredo Ernesto Salas, Planning Administrative Assistant at (505) 924-3370.

Please refer to the enclosed excerpt from the City Council Rules of Procedure for Land Use Hearing Officer Rules of Procedure and Qualifications for any questions you may have regarding the Land Use Hearing Officer rules of procedure.

Any questions you might have regarding Land Use Hearing Officer policy or procedures that are not answered in the enclosed rules can be answered by Crystal Ortega, Clerk to the Council, (505) 768-3100.
