1. The proposed carport would strengthen or reinforce the architectural character of the surrounding area by adding an ornamental structure that is consistent with the house on the subject site and the surrounding development. There is an existing metal across the street from the site.

The carport meets the minimum 3 foot setback from the property line (7 feet 5 inches from the front property and 5 feet 5 inches on the side ; the applicant is requesting a variance through the DRB process to allow the carport within the front setback; the subject site is not within CPO 3 or the Monte Vista College View Historic District; the Traffic Engineer has determined that the carport is not a clear site triangle issue ; the subject site is not within a designated Comprehensive Plan center or corridor.
4. The Traffic Engineer has determined that the carport wall is not a hazard to traffic visibility.
5. The carport will be 9 feet in height, not taller than the 10 foot tall primary building on the lot.

6. There are no affected neighborhood associations.
