1. The proposed carport would strengthen or reinforce the architectural character of the surrounding area by adding an ornamental structure that is consistent with the house on the subject site and the surrounding development. The adjacent property to the east has a carport.
2. The proposed carport would not be injurious to adjacent properties, the surrounding neighborhood, or the larger community because it will not add greater height and block views. The structure will have adequate drainage and will be compatible with the architectural character of the area.
3. The design of the carport complies with the provisions in Subsection 14-16-5-5(F)(2)(a)2 (Carports).
The carport meets the minimum 3 foot setback from the property line (3 feet from the front property and a minimum 24 feet from the sides ; the applicant is requesting a variance through the DRB process to allow the carport within the front setback; the subject site is not within CPO 3 or the Monte Vista College View Historic District; the Traffic Engineer has determined that the carport is not a clear site triangle issue ; the subject site is not within a designated Comprehensive Plan center or corridor.
4. The Traffic Engineer has determined that the carport wall is not a hazard to traffic visibility.
5. The carport will be 9 feet in height, not taller than the 12 foot tall primary building on the lot.
6. The applicant notified the Vecinos del Bosque Neighborhood Association and offered to meet regarding the request. The Neighborhood Association had no objection to the request, but asked that the neighbors adjacent to the subject site be made aware of the request.
